

Mini Rotating Flag Pole

This simple flag pole can be easily constructed using ½" schedule 40 PVC pipe.

Materials:

- 24" 1/2 Pvc Pipe
- 3 1/2 - End caps
- 1 1/2 - Tee
- 1 1/2 - 45 degree
- 1 Fender washer
- 1 3/8" steel rod – threaded rod or any steel shaft can be used
A wood dowel is likely to break
- 1 Stick Flag

Drill 2 two caps for rod and flag stick

I use a PVC cutter available at Hardware and Home Big Box stores to cut the pipe

Connect pieces – glue or press items together per images

It helps to grind point on one end of steel rod

Dimensions are not critical
