- The PREMIER 700C Series™ ability to bend while burning contributes to a cleaner burning candle.
- The PREMIER 700C Series™ is found to solve many of the burning issues associated with natural and soy candles.
- The PREMIER 700C Series™ are coated with our High Melt Wick Wax for added stability.
- Please contact us to discuss your specific candle application.
- If you find several wicks that work well in your candles, we will be happy to send more samples for final testing.
