

hi, i'm grampy jimmy,

i wonder if other missions start accidentally?

i was trying to eliminate another subscription fee.
i've been developing spreadsheets for about 40
years. yes, i'm an old ???

anyway, so i started another spreadsheet. and this
one turned out way better than i ever expected

so, what to do next ...

i'm don't want to start another business, blah, blah, blah, ya' know. but,
wanted to share this. i've gotten some great feedback from the few people
that have seen it. and, it keeps getting better

along with the fact our world is in a mess right now, and so many people don't
really understand their money. and ... this is my lane and how i can do a little
to help, so ...

i'll give it away! and if it helps someone else, which i think it will, then great!
and it's on a free platform, it shares easy, and there's millions of people in the
world that understand and use spreadsheets every day

i was avoiding this topic, but ... what's the beef with spreadsheets anyway? i
understand they might not be slick and polished like some of the apps, but ...

there's spreadsheets,,, and then there's platforms based on a spreadsheet for
the storage & other resources etc ... that are some of the biggest platforms in
the world

so anyhow, this is not just some guy ya' know's spreadsheet. i mean i
understand i'm just another guy ya' know, but this is an excellent spreadsheet
with website and social media support and has some great features and
displays pretty well on small screen

so give it a try

and if it helps you and your family, great! make a donation if you're able.

thanks,

jim raies
grampy jimmy
