Delivery

We will deliver bulls within 500 miles free of charge. All other delivery will be at cost. Delivery will occur as soon as possible after the sale as we can make arrangements. Bulls picked up and paid for the day of the sale will receive a \$100 discount per bull.

Terms & Conditions

Terms of the sale are cash unless prior credit arrangements are established between buyer and seller. Settlements are to be made with Valentine Livestock Auction after conclusion of the auction.

Health

All Red Angus bulls are coming virgin two-year-olds that have been tested for breeding soundness by Justin Ward DVM, Valentine, NE 402-376-1571

Scrotal measurements and scan data will be available on a supplement sheet on our website and at sale day. Cattle going out of state will need to be trich tested following the sale. The tests will be performed directly after the sale.

Breeding Guarantee

Bulls selling are guaranteed through the first breeding season, defined as 60 days following the 1st turn out. If a fertility problem occurs preventing the bull to perform a replacement bull of similar value will be provided if available. If a suitable replacement is not available then sales credit will be provided. Please notify us as soon as possible should an injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 15, 2026.

Liability

Each animal will be at the buyer's risk as soon as it is sold but will be cared for by the seller for a reasonable period of time. Every precaution will be taken for the welfare of the cattle sold. Neither the owner nor the sales management can be held responsible for accidents, but every effort will be made to provide for the safety and comfort of those attending the sale.

EPDs

All EPDs were pulled January 17, 2026

Welcome Fellow Cattlemen

Thank you for taking the time to look at our bull lineup. This is our 13th annual bull sale, and the majority of our bulls sold have remained in the Nebraska Sandhills region. From the beginning, our goal has been to raise bulls that thrive in our ranch environment. Our criteria is simple: a bull that can withstand a harsh environment, remain low-input, and still produce a high-quality product. Because of this approach, our bulls have also performed well in West Texas, the High Plains of Wyoming and Colorado, and the Dakotas. One of the greatest compliments we receive from customers is how good our bulls look when they come out of the cows in the fall. We aim to develop bulls that get the job done and hold up in any environment.

We are a fourth-generation family ranching in the Nebraska Sandhills of Cherry County at the Three Bar Ranch. Our operation is a commercial cow/calf and yearling program that has focused on rotational grazing practices since the 1980s. Heifers calve in April, with the cow herd pasture-calving in May and June. During the winter months, cows are maintained on cake and range. Our registered cows are managed the same way as our commercial herd—we believe there should be no difference in how a seedstock cow and a commercial cow are run.

We believe slower bull development contributes to longevity. Bull calves are weaned and fed in a pasture environment, then graze throughout the summer same as our yearling steers. This allows us to identify bulls with the performance and adaptability to grow in our conditions. While performance remains a priority, bulls are developed in a way that ensures durability. They continue grazing until October, when they are started on a protein pellet and hay until sale day.

The protein pellet we use is Bull Plus, a bull developer from J & R Feeds. It is formulated to deliver an amino acid package designed to balance the existing amino acids found in prairie hay. Bulls developed on Bull Plus consistently achieve large scrotal measurements and pass fertility evaluations without compromising production excellence.

These sale bulls are the top half of our bull crop.

Thank you for taking the time to look at our program.

Eric & Shannon Ravenscroft

Unable to Attend the Sale?

If you are unable to make it to the sale in person, the sale will be live on DVAuction. Where the catalog and videos will be available for viewing.

Recharge

#4529509

This bull will appear frequently throughout our catalog, and for good reason—he brings a lot to the table. Recharge comes from a highly maternal dam that represents everything we strive for in a cow. His dam is a 10-year-old cow with a 109 MPPA and outcross genetics. She is a daughter of Andras New Look, a sire whose daughters have shown exceptional longevity in the Sandhills for both our program and Bullis Creek Red Angus.

Recharge's progeny have consistently been heavy-muscled, combining performance with an attractive, functional design.

This DVO Cool Hand Luke son carries the muscle of his sire with added depth of rib and softness. A practical, well-balanced bull with natural dimension. Owned by Brad & Paula Pokorny

CED	BW	WW	YW	MILK	ME	HPG	CEM	STAY	MARB
12	-3.1	68	105	23	-2	13	6	16	0.51
58%	58%	47%	54%	71%	20%	26%	71%	34%	37%

This bull is out of one of our favorite cows, tracing back to the original Bootjack cow line. She has produced 10 calves with an impressive 112 MPPA, proving consistency and productivity. This smooth-made bull is sound, functional, and ready to go to work.

A full brother to this bull was purchased by K2 Red Angus last year, underscoring the consistency and quality of his dam. This bull posts solid ratios of 98 BW, 109 WW, and 111 Yearling. He's sired by a bull tracing back to a Miss Wix cow line, a cornerstone female referenced multiple times for her impact on our program.

This Recharge son traces back to Andras New Look 2012 on both sides of his pedigree, stacking proven, reliable genetics. He's a smaller-framed bull that excels in efficiency and maternal traits, 19% for ME, 12% for STAY, and 19% for MARB.

Priscilla

Priscilla is a 9 year old mare. She's gentle, sound, and easy to ride. I've used this mare in rough country gathering cattle, sorted on her, drug a pile of calves, doctored yearlings by myself outside, ridden her in my grow yard, and day worked on her at the sale barn. She's sat for months, and saddled up and rode off, no trouble. You can do any ranch job you need to on her and she's willing and kind every day. My daughter has been riding her a little and with a little time I think she'd fit a kid with some experience. Mares like this don't run in big bunches and they're not on every corner for sale.

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

We Tip Our Hat

Memorials

This past year, our community faced the loss of several valued members. We are grateful for the role they played in cattle country and for helping keep the American dream alive.

Mabel Gale Adamson

1927-2025

Last year, Eric lost his grandmother, Mabel Adamson, a woman who truly embodied grit. Born on her family ranch in the Sandhills of Nebraska, Mabel remained rooted there throughout her life. Mabel will be remembered for her warmth, positive spirit, kindness, and deep love for the Sandhills.

Jerry Adamson

1939-2025

This past year, we lost Jerry Adamson a neighbor, cattleman, and friend. He truly embodied the cowboy spirit and never met a stranger. Jerry's keen eye for cattle and deep knowledge of the beef industry helped shape cattle country as we know it today. We are grateful for his friendship and his lasting commitment to the cattle industry.
