

Ravenscroft Red Angus

---

**ANNUAL PRODUCTION SALE**

---

2 PM Central February 25, 2023  
at Valentine Livestock in Valentine, NE

# CUSTOMERS & FRIENDS

## SALE INFORMATION

Bulls are available for review at the ranch located in central Cherry County 35 miles south of Nenzel, NE. February 24 they will be on display at Valentine Livestock, Valentine, NE. Feel free to come look or call us with any questions you may have.

If you can't make it in person the sale will be broadcasted live on DVAuction. Catalog and videos are available for viewing on DVAuction.com

**DVAuction**  
*Broadcasting Real-Time Auctions*

**THIS SALE WILL BE BROADCAST LIVE ON THE INTERNET.**

Visit [www.DVAuction.com](http://www.DVAuction.com) and register today.  
For general questions please contact our office:  
(402) 316-5460 or [support@dvauction.com](mailto:support@dvauction.com)

Again this year Bowlin Cattle Co. will be selling 50 Black Angus bulls immediately after the red bulls.

## SCHEDULE OF EVENTS

Friday February 24 bulls will be on display at Valentine Livestock.

Saturday February 25 2:00 PM (CST) Red Angus bulls sell first, immediately after Bowlin Cattle Co Black Angus bulls sell.

## HEALTH

All Red Angus bulls are coming virgin two-year-olds that have been tested for breeding soundness by Justin Ward DVM Valentine, NE 402-376-1571.

Scrotal measurements will be available on a supplement sheet on [ravenscroftredangus.com](http://ravenscroftredangus.com) and sale day.

Cattle going to out-of-state buyers will need to be trich tested following the sale. The tests will be performed quickly after the sale.

## BREEDING GUARANTEE

Bulls selling at \$3000 or more are guaranteed through the first breeding season defined as 60 days following 1st turn out. If a fertility problem occurs preventing the bull to perform as a breeder, a replacement bull of similar value will be provided if available. If a suitable replacement is not available, credit for the full purchased price, less salvage value, will be issued to the buyer for next year's sale. Please notify us as soon as possible should an injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 15, 2023. This does not cover poor management or neglect.

## DELIVERY

Free delivery within Nebraska and to central points to neighboring states. We will assist all buyers on delivery the cheapest way possible.

Bulls picked up and paid for the day of the sale will receive a \$100 discount.

## ANNOUNCEMENTS

Announcements made sale day and from the auction block during the sale take precedence over printed material in the catalog.

EPDs in catalog as of January 7, 2023

## SALE TERMS & CONDITIONS

Cattle will sell under the standard terms and conditions as recommended by the Red Angus Association of America. [www.redangus.org](http://www.redangus.org)

## LIABILITY

Each animal will be the buyer's risk as soon as it is sold but will be cared for by the seller for a reasonable period of time. Every precaution will be taken for the welfare of the cattle sold. Neither the owner nor the sales management can be held responsible for accidents, but every effort will be made to provide for safety and comfort of those attending the sale.

# GREETINGS

Thank you for taking the time to look at our bull line up. This is our tenth annual bull sale. The majority of our bulls sold have stayed in the Nebraska Sandhills region. The best compliment we receive from our customers is how great our bulls look when they come out of the cows in the fall. We want to develop bulls that are going to get the job done and hold up in any type of environment.

We are the fourth-generation family to be ranching in the Nebraska Sandhills of Cherry County. The family ranch is the Three Bar Ranch. The ranch is a commercial cow/calf and yearling operation that has focused on rotational grazing practices since the 1980's. We calve our heifers in April, and the cows will pasture calve in May and June. In the winter, our cows are run on cake and range. We run our registered cows in the same manner as the commercial herd. We feel there should not be a difference between how you run a seed stock cow and a commercial one.

We believe the slower development of our bulls adds to the longevity of them. The bull calves are not pushed and will graze throughout the summer like our yearling steers; this shows us which calves have the performance to grow in our environment. Performance is still a must in how we develop our bulls. The bulls continue grazing throughout the summer until November, when we start feeding them a protein pellet and hay in a 300-acre pasture until sale day.

The protein pellet is "Bull Plus" a pelleted bull developer from J & R Feeds that is formulated in a way that delivers an amino acid package designed to balance the existing amino acids found in the "on-ranch" feed stuff being fed by Ravenscroft Red Angus. Along with native grass hay and some alfalfa, Bull Plus creates a ration that is extremely efficient at turning forage into muscle, paving the way for a bull that holds up to the demands of a breeding animal without showing the wear and tear that can be found with bulls developed on rations that are higher in starch. Bulls developed on Bull Plus consistently have a large scrotal measurement and pass fertility evaluations with flying colors, without compromising production excellence.

These sale bulls are the top half on the 2021 bull crop  
Thank you for taking the time to look at our program.

*Eric & Shannon Ravenscroft*

## **RED ANGUS GUIDE TO EPDS** **RedAngus.org**

**ProS.....** Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

**HB .....** HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

**GM.....** GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

**CED .....** Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

**BW .....** Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

**WW .....** Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

**YW .....** Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

**ADG.....** Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

**DMI .....** Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

**MILK .....** Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

**ME .....** Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

**HPG.....** Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

**CEM .....** Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

**STAY.....** Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

**MARB....** Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

**YG .....** Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

**CW .....** Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

**REA .....** Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

**FAT.....** Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

Good ratios and EPDs. Dam has a 106 mppa on 7 calves that means more on this place than epds.

Out of a RAVN Lakota Ridge daughter. This bull is stacked with calving ease.

### **In Loving Memory**

This year's sale is dedicated to the memory of Doug Crouse. Doug bought and sold cattle for the Three Bar Ranch for 30 years. Thousands of cattle, laughs and stories went by the scale house.

*Thank you, Doug.*

Thank you for your support
