SCHEDULE OF EVENTS

Sunday Feb. 23 Bulls will be on display at Valentine Livestock.
Monday Feb 24 3:00 (CST) Bull Sale

HEALTH

All bulls are coming virgin two year olds that have been rich tested so the can go out of state on sale day. All bulls have been tested for breeding soundness by Justin Ward, DVM Valentine NE 402-376-1571

Scrotal measurements will be available on a supplement sheet along with scan data posted on DVAuction web site before the sale and available sale day.

BREEDING GUARANTEE

Bulls selling at \$3000 or more are guaranteed through the first breeding season defined as 60 days following 1st turnout. If a fertility problem occurs, preventing the bull to perform as a breeder, a replacement bull of similar value will be provided if available. If a suitable replacement is not available, credit for the full purchased price, less salvage value, will be issued to the buyer for next year's sale. Please notify us as soon as possible should an injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2020. This does not cover poor management or neglect.

DELIVERY

Free delivery within Nebraska. We will assist all buyers on delivery. Bulls will be delivered the following two weeks after the sale.

DISCOUNT

Bulls picked up and paid for the day of sale will receive a \$100 discount.

SALE TERMS & CONDITIONS

Cattle will sell under the Standard terms and conditions as recommended by the Red Angus Association of America. Settlements are to be made with the clerk immediately after the conclusion of the auction. Anyone attending this sale does so at their own risk.

ANNOUNCEMENTS

Announcements made sale day and from the auction block during the sale take precedence over printed material in the catalog.

Catalog design: ChristyMurry.com

GREETINGS

Thank you for taking the time to look at our bull line up. This is our seventh annual sale. The majority of our bulls in the last six years that we have sold have stayed in the Nebraska Sandhills region. We want to develop bulls that are going to be turned out in large herds of cows in big hill country and get the job done.

We are the fourth-generation family to be ranching in the Nebraska Sandhills of Cherry County. The family ranch is the Three Bar Ranch. The ranch is a commercial cow/calf and yearling operation that has focused on rotational grazing practices since the 1980's. The calving date for our heifers is April and the cows pasture calve in May and June. In the winter our cows are run on cake and range. We run our registered cows in the same manner as the commercial herd. We feel there should not be a difference between how you run a seed stock cow and a commercial one.

We believe the slower development of our bulls adds to the longevity of them. The bull calves are not pushed and will graze throughout the summer like our yearling steers; this shows us what calves have the performance to grow in our environment. Slow developed bulls still need to have performance. The bulls continue grazing through the summer until November, when we start feeding them some protein and hay in a 300-acre pasture until sale day. The two and a half days at Valentine Livestock are the longest time these bulls have ever been in a pen.

Thanks for taking the time to look at our program

Eric & Shannon Ravenscroft

NOTES

RED ANGUS GUIDE TO EPDS

For more information, visit RedAngus.org.

- HB** – HerdBuilder is a maternally focused selection index that predicts the probability of developing profitable cowherd traits while maximizing the value of marketed progeny. Expressed as dollars per cow exposure, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained, and all remaining progeny are marketed on a quality-based carcass grid. (Index/High Value)
- GM** – GridMaster is a terminally focused selection index that predicts the probability to increase the value of marketed calves. GM places selection pressure on growth, feedyard performance and carcass quality, predicting differences in profit as expressed per cow exposure. GM is calculated based on the scenario that bulls are mated to cows only, and all progeny are marketed on a quality-based carcass grid. (Index/High Value)
- CED** – Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)
- BW** – Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)
- WW** – Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)
- YW** – Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)
- ADG** – Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)
- DMI** – Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)
- MILK** – Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)
- HPG** – Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)
- CEM** – Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)
- STAY** – Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)
- MARB** – Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)
- YG** – Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)
- CW** – Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)
- REA** – Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)
- FAT** – Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

THRIVE

Ranch Tested. Rancher Trusted.

Red Angus

RedAngus.org

**Position your ranch to thrive with
the industry's most-favored female.**

An independent university study compared eight years
of Superior Livestock Auction data, revealing
Red Angus-sired heifers commanded up to \$11/cwt
more than females of all other breed types.
