McMURRY CATTLE

*Still the leading source of tenderness
in the Hereford breed.*

McMurry Cattle remains focused on balanced traits that support forage efficiency, soundness, maternal strength and added carcass value in a high desert dryland setting. Our AI and ET program assures incorporation of proven genetic sources.

Many of our cattle are homozygous polled. We offer a select group of yearling bulls at Private Treaty and quality females are available.

MC RANGER 9615 (AI) • P23895865

Sire: CIRCLE-D WRANGLER 832W

Dam: SBF ROYAL GYPSY

PERFORMANCE BEEF: WHERE DATA MEETS DECISIONS

Manage individual animal data

Use historical data trends to make the best financial decisions for the future

Feel confident knowing what each pen was fed and when

Know exact bull and heifer development costs to make better marketing decisions ahead of sale day

Spot health issues and performance outliers sooner

Performance Beef is a great snapshot of what our bottom dollar needs to be when we're selling these bulls. If any of these bulls aren't going to make that, it makes culling decisions much easier.

A photograph of a herd of Hereford cattle in a green field at sunset. The sun is low on the horizon, creating a warm orange and yellow glow. In the background, there are rolling green hills and a small dark barn. The cattle are in the foreground, with one large bull prominently in the center-left, looking towards the camera. Other cows and calves are visible behind it.
