SAORSA {SEER-sha} is a business management consultant company that specializes in bringing large corporation solutions to small and mid-sized businesses.

Our innovative processes can be tailored to fit your current culture and structure to enhance what you already do, or if desired, we can support your organization as it makes steps to transition from an established legacy company to a new and enhanced business culture.

We understand that not every company has the resources to have its own estimating department, safety group, analytics division, or dedicated scheduler; we offer our services to help businesses keep overhead costs down by bridging the gap.

Our custom solutions are designed to get you professional services that can either enhance already existing functions or replace them, based on your need. It is our hope to be more than a consultant- **we want to be part of your business family and success!**
