# POST-PRODUCTION SERVICES

Where ideas come to life.

- · Video Editing
- · Illustration and Layout Design
- · Motion Graphics & 2D Animation
- · Color Grading and Sound Design

# AVR TECHNOLOGY SOLUTIONS CORPORATION

Advancing Further

# **COMPANY PROFILE**

**AVR TECHNOLOGY SOLUTIONS CORPORATION** is a dynamic organization which aims to bring the latest technological advances in the areas of satellite cable television, closed circuit television, PABX systems and Software to commercial and residential clients.

Years of exposure to digital trends have equipped the company with the expertise to provide clients with exceptional yet cost-effective digital services. Its highly responsive after-sales structure is composed of skilled technicians to ensure customer satisfaction at all times.

# **COMPANY BACKGROUND**

**AVR TECHNOLOGY SOLUTIONS CORPORATION** evolved out of its owner's **(Mr. Arvin S. Vitales)** love for cable television. Upon transferring to a new residential area in 2007, he was disappointed to find that there was no cable provider on-site to service the new community.

Soon he was elected as President / Chairman of the Summerfield Homeowners' Association in Mexico, Pampanga, Mr. Vitales which initiated discussions with various wired and wireless cable TV providers with the aim of making the service available in the area.

Negotiations with wired cable companies were unsuccessful, given the investment cost and time requirement to lay out cables to connect from existing plant facilities to individual homes. Mr. Vitales tried out a wireless provider, which provided disappointingly poor reception and limited channels.

It was only after trying out several options that Mr. Vitales found CIGNAL Digital TV, which was able to readily provide for their growing number of housing occupants in Summerfield, Mexico and delivered high quality reception with very good channel selection.

Himself a satisfied CIGNAL customer, Mr. Vitales became a personal endorser of the service to members of his community and to friends and acquaintances. His solid background in sales, having been a pharmaceutical salesperson for almost two decades, brought in so many referrals as a freelance agent that the CIGNAL dealership in Pampanga took notice and immediately offered him a Dealership deal.

What started as a hobby eventually led to a more thorough study of the business of installing, maintaining and optimizing satellite cable services. In November 2009, a chance to formally join forces with the leading satellite cable TV provider in the Philippines under the Manny V. Pangilinan Group of Companies led to a dealership in contract the

province of Pampanga. It was through this engagement that Mr. Vitales was exposed to the marketing and technical aspects of satellite cable TV management.

Further exposure to other territories such as Tarlac and Pangasinan deepened the owner's appreciation of the satellite cable TV business. Within two years, his group quickly established itself as the leading provincial dealer of CIGNAL nationwide, registering significant growth in the subscriber bases of Pampanga, Tarlac and Pangasinan.

By this time, **AVR TECHNOLOGY SOLUTIONS CORPORATION** expertise has extended beyond satellite TV for residential clients to customizable cable head-end systems for commercial and industrial establishments.

The company was also able to align itself with the emerging trend for reliable closed-circuit television for surveillance and security purposes. It added the installation of such services in its portfolio in 2011. A more recent addition to its services is the installation of PABX systems, Telecommunications and Software.

# **COMPANY VISION**

**AVR TECHNOLOGY SOLUTIONS CORPORATION** continues to look to the future, adapting to advances in technology to provide clients with more choices that are responsive to their needs. It aims to be a lifetime partner to its clients through cost-effective and customizable products anchored on complete customer satisfaction.

Its vision is to be preferred one-stop shop for electronic equipment installation and after-sales servicing of clients, consolidating under one roof essential electronic requirements needed to operate efficient homes and businesses.

# **COMPANY MISSION**

**AVR TECHNOLOGY SOLUTIONS CORPORATION** mission is to provide clients with satellite and other technology-based services at reasonable price points, extending to them quality after-sales customer care. The company aims to continue honing its expertise on current services while adding more to its portfolio in order to be a complete technological partner to its clients.

# MANAGEMENT OVERVIEW

**AVR TECHNOLOGY SOLUTIONS CORPORATION** is led by Mr. Arvin S. Vitales, a former pharmaceutical salesperson with a keen interest in electronics and communications. An opportunity to join CIGNAL in 2009 allowed him an in-depth exposure to satellite TV, while his sales proficiency from the pharmaceutical industry helped CIGNAL expand its client base with new clients.

In 2012, Mr. Vitales decided to quit his job to concentrate on **AVR TECHNOLOGY SOLUTIONS CORPORATION**, which has since included other services such as CCTV,

PABX, SOLAR installations and Software. As General Manager, Mr. Vitales maintains a hands-on approach to his business, personally meeting with clients to create customizable home and business solutions.

IN 2018, advancing further partnership and Joint Venture with different companies.

 Awarded One Year Project thru partnership with CONVERGE ICT SOLUTIONS INC. for Installation of FTTH

 Partnership with BLUE MOUNTAIN SAFETY PRODUCTS, AVR as their Central Luzon Exclusive Distributor for Personal Protective Equipment's (PPE).

 Partnership with D3I Company. (Software Developer), advancement of the Barangay Management Information System (BMIS), Barangay Legal Forms and Documents (BLAD) and e-POLL Watcher, a Web Based Application and Mobile Apps used for Monitoring Political Coordinators during 2019 National Elections.
