ROBOTS, AI AND NUKED UP COUNTRIES RUN BY MORONS.**

Karmageddon is a film skewed directly against the generations that grew up playing video games and never lived through a cold war. And now must face a world of AI-Generated robots and nuclear armed tribal nations.

But young, bright, modern minds don’t learn by having messages drilled into their heads.

To convince them, you have to get their attention and engage with them. You have to entertain them in order to enlist them.

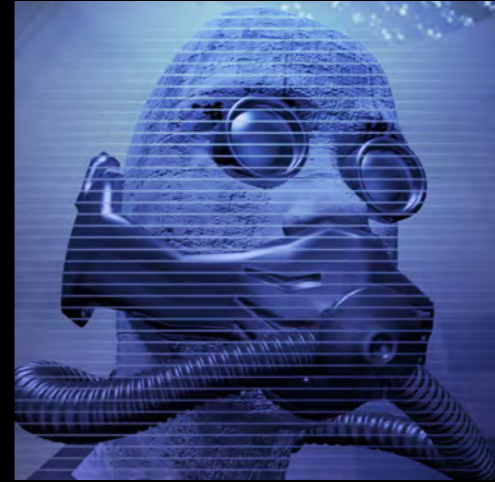

KARMAGEDDON is how we intend to do that.

Young people today crave technology, challenging ideas and forward-thinking solutions.

Any messaging to them must incorporate this in both content and execution.

KARMAGEDDON has Ruthless Rulers, Martians, Robot Armies, Alien Invasions and Heroes coupled with the world of AI, Tech and Nukes.

Exactly what the youth of today want.

The year is 2045.

She may look like a fun-loving teen girl.

She is the newest in AI Robotics and an expert at diffusing nuclear devices.

She can also be ***A Lethal Weapon.***

She prevents conflicts from escalation and devastation.

She assesses enormous amounts of intel and data at much faster speeds than previous analysts...and without the less favorable aspects of human decision-making, such as bias, anger, fear and prejudice.

Starring Mia Talerico, star of the Disney Hit Series, *Good Luck Charlie*.

SIERRA VON: THE FACE OF THE RESISTANCE

Unstable, crazy leaders are everywhere. Russia, Israel, Pakistan, India...you name it! Within the plot, we'll meet a young, beautiful, brilliant Nuclear Weapons Professor named **SIERRA VON**. She works for one of the most fierce anti-nuclear weapon agencies in the world. But she is suffering from visions.

She fears a dystopian future run by robot armies, a world decimated by wanton destruction, Texas secession and Eco-disasters.

This negative vision, as told to her Android therapist emboldens Sierra and her forces to keep moving forward to ensure a safer world.

KARMAGEDDON

is Oppenheimer on steroids with the look of Blade Runner and...

EARTH-SHAKING VIDEO GAME ACTION.

With non-stop visual thrills, Karmageddon follows a group of young heroic peace advocates lead by Sierra to rid the world of nuclear weapons.

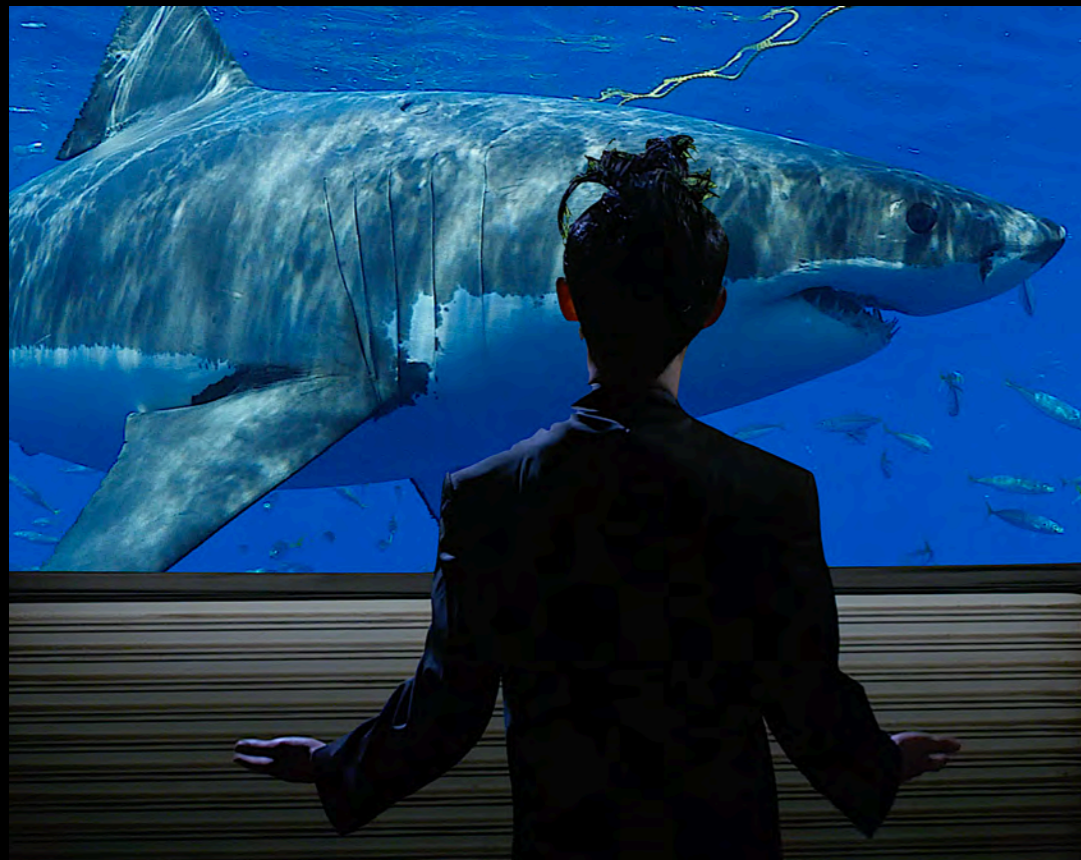

Sierra has a vision. After the reckless decisions made by world leaders lead to devastating apocalyptic events, it is thought that the former regime of **Kim Jong Un**, along with the entire population of his North Korea has been utterly destroyed.

But, **Kim Jong Deux** - Kim Jong Un's daughter, the reluctant female heir to the dynasty, is discovered in Hong Kong. She is a wild party girl who also is a lethal secret agent who does not intend to return to her homeland.

We quickly learn **Kim Jong Trois**, son to Kim Jong Un and brother to Kim Jong Deux, is a quirky teenage tyrant living deep beneath the North Korean earth in a nuclear bunker with his underground shark tank. He is still able, with the help of a few of his remaining generals, to launch a dangerous arsenal of missiles.
