DESCRIPTION

Our most popular feedlot gate is our the 5-bar, 16' feedlot gate. Each gate is constructed of 1.9" 14 gauge American-made steel tubing with standard pipe on the hinge end. All top corners are mitered, and all other cuts are saddled for maximum strength! MJE LE offers a variety of customization points to meet the needs of every situation. Contact our sales department for a consultation and quote that meets your needs. Volume discounts are available with every option.
