

April 2026

Dear Pastor Ralph,

*"I thank my God upon every remembrance of you, always in every prayer of mine making request for you all with joy, for your fellowship in the gospel from the first day, until now."
(Philippians 1:3–5)*

Like the apostle Paul to the believers in Philippi, ICR is filled with gratitude every time we remember you. Your faithful support is more than a gift; it is a partnership in the work the Lord Jesus, our Creator, has set before us.

Your generosity is more vital than ever as ICR's President Dr. Randy Guliuzza, along with ICR's team of research scientists, advances groundbreaking work in engineered biology. Current efforts are focused on examining organisms' adaptive capacity, specifically how living systems exhibit regulated, nonrandom responses to environmental pressures.

This work contributes to a developing, testable framework for interpreting biological complexity and origins while ultimately pointing to the intentional design of life by the Lord Jesus Christ, the true Engineer.

ICR presses forward in our biological research to bring scientific clarity to critical questions. Because of your financial support, this work continues with strength, integrity, and boldness.

As ICR continues proclaiming the truth of God's creation, we reflect even further on Paul, and his gratitude for the church in Philippi: "I thank my God upon every remembrance of you . . . being confident of this very thing, that He who has begun a good work in you will complete it until the day of Jesus Christ" (Philippians 1:3, 6).

Sincerely thankful,

James Gadberry

Director of Development and Donor Relations
