

# Coastal School

SORRENTO PRIMARY SCHOOL

## OUTDOOR LEARNING PROGRAM FOR FOUNDATION STUDENTS MONDAYS - 8:45AM - 3:00PM

### Curriculum and Connection

All Foundation students spend one full day per week at Coastal School, located at the stunning Point Nepean National Park. Here, they experience guided, integrated learning across the curriculum and develop a strong sense of identity and connectedness to the natural environment. Literacy and Numeracy skills are taught and practised through hands-on experiences and are linked to the curriculum and to learning back in the classroom.

Students learn and play across classes, which facilitates social and emotional development and growth.

### Feedback From Families

*"Coastal school was one of the main reasons I chose Sorrento primary for my daughter. We spend so much time outside in our everyday life, transitioning to school I thought it may be difficult for her. The coastal school has been a huge highlight of school for my daughter. Being able to see echidnas, kangaroos, blue tongues and dolphins while at school is incredibly special. I really hope they run this through all the years of school."*

*"The transition into big school was so much easier for my daughter spending the first day of the week at Coastal School. She would come home telling us about her adventures and sightings of dolphins, echidnas and kangaroos on a weekly basis. This really helped break up the routine, she also loved having the time outdoors with her newly made friends. Making her new letters out of sticks, drawing words in the sand - we are so lucky to have had this opportunity - thank you to all involved for making this such a nurturing and fun experience."*
