Turn-key Services for a New Project, is a boon to Investors

The efforts and efficiency to coordinate with various Vendors & Service Providers is reduced to bare minimum, resulting in a faster execution of Projects.

All key Services are synchronised and Scheduled for flawless execution.

Time Bound & Budget bound – No project overruns! Timely Execution ensures savings on Capital Cost, Interest, Early start of Production and many more benefits!

We kick start with the Philosophy “ **Right First Time**”.

Our approach is Scientific and Practical.

Every decision is scientifically evaluated, its effect on CAPEX & OPEX.

What is designed is what is delivered.

Project Consultancy, Management & Coordination

Starts with designing of the Product Basket

The product basket helps us to design the required Spinning Plant

The Spin Plan reflects the Product basket & Production Capacity

Machinery balancing keeping Future requirements & Flexibility

Selection of the required machinery by scientifically evaluating the Technology, CAPEX and OPEX

Ascertaining the Level of Automations required & resultant benefits.

Lay out Preparation & finalization.

Architectural design and Structural Design & review

Timely release of these drawings to Civil Contractors

Electrical consultancy to design HT/LT, Transformer Capacity, Panels & PDB's, Cable sizes and length, Lighting, Safety etc all with BOQ and Tender Documents for vendors & Suppliers, Contractors.

Utilities design for Compressors, H-Plant, Water , Service Rooms, Offices, SQC, Stores etc.,

H Plant & Waste Collection Design and Validation

Identification & Selection of Vendors & Contractors.

Project Consultancy, Management & Coordination

Preparation of technical report for DPR (Bankable)
TDS – Technical Data Sheet finalization
Scheduling Details & Preparation of GANTT CHARTS for Project Execution
Periodic progress review
Preparation of Organisation chart.
Interview & selection of Technical / Operations Head
Evaluation & Selection of required accessories
Evaluation & Selection of required Testing Laboratory Equipment
Coordination with various agencies & Contractors during the course of Project.
Periodic review meetings with Machine suppliers, vendors and contractors.
Review erection quality, speed and review progress
Process settings during Production Start.
Process stabilization before commencement of commercial production.
Implementation of Production report formats
Continued technical support from our Technical Advisory services till stabilisation of commercial production.

Architectural Services

Starts with designing Plant layout

Study site suitability for spinning project

Survey drawings and Soil test reports will be required beforehand.

Study of Seismic zone, wind velocity etc before designing structural design.

Optimised design for a stable structure and Efficient factory shed.

Coordination with OEM suppliers and H Plant suppliers for foundation and trench design.

Coordination with Civil contractors during execution of project

Providing the management with BOQ for procurement of steel, cement etc.

Release of Foundation, Structural & Civil drawings phase wise

Review and monitor the progress

Achieve cost savings through efficient designs.

Deliver the project in time and within cost frame.

- *Project Financial Services*

Electrical Consultancy

Once the Spin Plan and utilities are finalised, layout is finalised, the connected load is analysed and transformer capacity and specs, switch gear requirement, PDBs requirement, cable requirements, lighting and safety requirement etc is designed.

- Single Line Diagram (SLD)
- Incorporated Safety
- Detailed drawings
- Technical Specifications of Transformers, Switch gear, LT/HT panel, Switch Yard, PDB's, APFC panel, Lighting, Cables are prepared.
- Bill of Quantities (BOQ) is prepared

This will help the mills in procuring these items from Suppliers and execution of the same from contractors at competitive prices without compromising on quality and safety.

During execution, periodic visits & review will be conducted.

Laision with Govt. Officials will be in Mills scope.

Erection & Installation Services

The services covered are Installation of the following machinery.

- Production Machinery with control wiring
- Accessories such as OHTC, Fire & Metal detectors, YCP
- Automations such as ISM/RSM, BTS,CTS
- Humidification Plants & Waste Collection Systems
- The team will be responsible for keeping all the process settings as per process parameters during erection itself.
- As erection is a one time job and the machines will work for 15 years, it should be done with perfection & precision. Our team executes it with “Right First Time approach” and zero re-works or damages.
- After commencement of production, you can use this team for Fine tuning, Maintenance activities if required on cost basis.

Project Financial Services

You can utilise these services for

- Term Loan
- Working Capital
- Subsidies, etc

For your proposed project.

These are associate services provided by Professional, Project finance Specialised CA's.

AUDITS:

We provide technical audits for you

- Process
- Maintenance
- Compressed Air &
- Thermography.
