VACCINATION REQUIREMENTS

We take great care to maintain a healthy environment for your pet/s. Stringent screening and core vaccination requirements are essential to maintaining a healthy environment. Even with rigorous precautions pets, on occasion, may become ill or injured. Our staff will take appropriate action in the event your pet/s requires veterinary care. You (the Pet Owner) are responsible for any and all costs associated with the care of your pet.

Sun Pet Care, Inc. requires all pets entering the facility, for any service, must be current on a set of **core vaccinations**. Our core vaccination requirements help to protect the health of all pets entering our facility. The following were considerations in the development of our core vaccination requirements:

- Evaluation of pet interaction in the Facility.
- Recommendations of local veterinarians.
- Review of American Veterinary Medical Association Vaccination Protocol.
- Governmental vaccination requirements.

Immunization is a very important part of your pet's preventive health care. Most vaccinations are effective and will prevent or minimize the efficacy of an infection / illness. A vaccinated pet may not develop adequate immunity and it is possible for these pets to contract an illness for which they have been vaccinated.

Veterinarians may tailor vaccination programs that differ from our core vaccination requirements. Although some veterinarian may not require our core vaccinations, we will not waiver our standards. Proper documentation certifying your pet/s is current on the following vaccinations must be submitted before your pet/s is admitted to any Sun Pet Care, Inc. Facility and before any reservations for service can be scheduled:

CANINE

- Rabies
- Distemper, Parvo
- Canine Influenza

FELINE

- Rabies
- FVRCP -Rhinotracheitis, Calicivirus, Panleukopenia (Feline Distemper)

ONLY PETS CURRENT ON CORE VACINATIONS WILL BE ADMITTED TO SUN PET CARE, INC. FACILITY.

CANINE BORDETELLOSIS (Kennel Cough) - Any canine interacting with other canines runs a risk of contracting an illness including Bordetellosis (commonly referred to as Kennel Cough). Bordetellosis is caused by bacterium *Bordetella bronchiseptica*, which is often present in the respiratory tracts of many animals. It is a primary cause of tracheobronchitis (kennel cough), which can result in a severe chronic cough. In addition to the cough, some dogs develop a nasal discharge. Transmission most frequently occurs by contact with the nasal secretions of infected dogs.

Pets that have received regular Bordetella and Canine Influenza vaccination are still at risk of contracting these infections. For further information regarding illnesses and vaccinations we recommend you consult with your veterinarian.

PARASITE PROTOCOL

All pets entering the facility must be free of external parasites such as fleas and ticks, as well as internal parasites such as Heartworm, Hookworm, and Roundworm. Any pet discovered with parasites will be administered appropriate treatment to resolve the infestation.
