GET THE MOST OUT OF YOUR ROOF

At Nu-Ray, we look at your purchase as a long-term investment. By taking a systematic approach to quality control, we deliver results that are strong, elegant, and built to last. Whether you're building your dream home or rehabbing a beloved woodshed, our metal products make it easy to achieve the exact look you envision.

We also offer a variety of styles and finishes to ensure you are selecting the best metal products for your project. No matter your price point, we offer top of the line products for all budgets.

Featuring:
NRM-6000 old town gray
16" with striations

WARRANTY

Best warranties in the market. Including our exclusive Ocean Guard and Puget Sound Warranties.

EXPECTED LIFE SPAN

Our warranties span up to 50 years, but metal roofing has proven to last many years longer.

AESTHETIC

With over 50 different colors and finishes, our products offer a combination of perfect design aesthetic is obtainable.

MAINTENANCE

Our very low maintenance products are easy to keep looking brand new.

ENVIRONMENT

Being 100% recyclable is just the tip of the iceberg for the positive impact on the environment.

SUSTAINABLE

Our metal panels are constructed out of a minimum 25% re-purposed steel, qualifying our products to be labeled as "green". Our products are 100% recyclable at the end of their useful life, unlike other roofing materials which are routinely disposed of in landfills by the ton.

EXPOSED FASTENER PANELS

Featuring:
NRM-6000 charcoal gray
16" with accent ribs

NRM-4000

TECHNICAL INFO

- 0.625" tall rib design
- 36" width standard
- Anti-siphon groove
- Exposed fastener design
- Minimum roof pitch 3:12

ARCHITECTURALLY ATTRACTIVE - NRM-4000 panel can be specified on various building applications, including roofs, walls, and soffits. The product can be manufactured in lengths ranging from 4'-0" to 48'-0".

NRM-7000

TECHNICAL INFO

- 1.50" tall rib design
- 36" width standard
- Exposed fastener design
- Structural
- Minimum roof pitch 3:12

DESIGNED FOR FLEXIBILITY - NRM-7000 panels offers exceptional design flexibility and structural performance. This product can be specified for applications related to roofs, walls, liner panels, and equipment screens. Perforated NRM-7000 panels also work well for interior, acoustic, and exterior shade applications. The product can be manufactured in lengths ranging from 4'-0" to 48'-0".

NRM-9000

TECHNICAL INFO

- 0.875" tall rib design
- 32" width standard (wall)
- 29" width standard (roof)
- Exposed fastener design
- Minimum roof pitch 3:12

CORRUGATED ROOFING AND SIDING PANEL - The NRM-9000 panel offers many uses in the building industry beyond roofing. Other uses include walls, mansards, fences, and screens. Perforated panels offer great design options as well. The product can be manufactured in lengths ranging from 4'-0" to 48'-0".

CONCEALED FASTENER PANELS

NRM-1000

TECHNICAL INFO

- 1.50" tall rib design
- 12" & 16" widths standard
- Accent options: Flat (24ga only) - Striations - Ribs
 - Floating clip design spaced 18.00" on center
- Minimum roof pitch 3:12

THE CLASSIC METAL ROOFING PANEL - NRM-1000 is a low maintenance metal roofing panel with all the advantages you want. With a tall, narrow rib design and multiple width and accent options, NRM-1000 may be the perfect fit for your home. The product can be manufactured in lengths ranging from 4'-0" to 48'-0".

NRM-1750

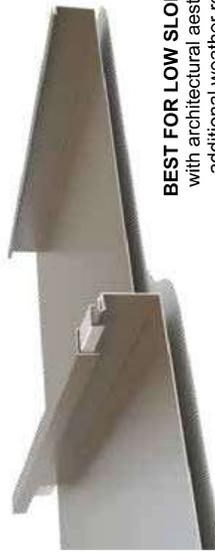

TECHNICAL INFO

- 1.75" tall rib design
- 14" & 18" widths standard
- Accent options: Flat (24ga only) - Striations - Ribs
- Snap-lock plus floating clip design
- Minimum roof pitch 2:12

OUTPERFORMS ALL OTHERS - Blending the best of metal roofing styles, the NRM-1750 meets almost any requirement. The panel utilizes a floating clip to accommodate thermal expansion and contraction, plus a continuous locking feature that makes the panel far stronger than any other types. The product can be manufactured in lengths ranging from 4'-0" to 48'-0".

NRM-2000

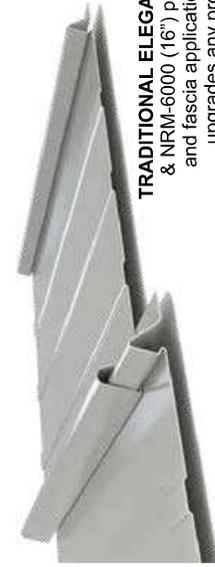

TECHNICAL INFO

- 1.50" tall rib design
- 12" & 16" widths standard
- Accent options: Flat (24ga only) - Striations - Ribs
- Floating clip design spaced 18.00" on center
- Minimum roof pitch 1/2":12

BEST FOR LOW SLOPES - NRM-2000 panels combine structural panel strength with architectural aesthetics. Factory-injected seam sealant can be provided for additional weather resistance. NRM-2000 is designed to be installed on very low pitched roofs, with a built in anti-siphon mechanically seamed seam. The product can be manufactured in lengths ranging from 4'-0" to 48'-0".
(for longer lengths, please inquire about onsite forming)

NRM-5000/6000

TECHNICAL INFO

- 1.00" tall rib design
- 12" & 16" width standard
- Accent options: Striations - Ribs
- Snap-lock design
- Minimum roof pitch 3:12

TRADITIONAL ELEGANCE - The snap-together design of the NRM-5000 (12") & NRM-6000 (16") panels makes them ideal for roofing, mansard, canopy, and fascia applications. Simple installation with a premium look instantly upgrades any project. The product can be manufactured in lengths ranging from 4'-0" to 48'-0".

NRM-6000 Weathered Copper
16" with Striations

ECO-FRIENDLY

Nu-Ray metal roof panels are engineered to comply with ENERGY STAR solar reflectance limits for steep-slope roofing products. Asphalt based attic roofing products retain heat well after the sun sets resulting in high attic temperatures throughout the entire day. Metal on the other hand, becomes ambient temperature quickly, resulting in lower attic temperatures and lowering AC costs.

METAL FOR HOMES

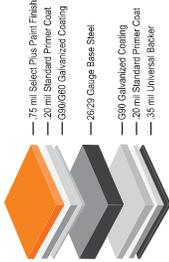

When it comes to your homes needs, choosing the right colors, paint systems, fasteners, gauge, and panel type depends on the style and look you want and the durability you need. Metal is increasing in popularity among homeowners due to its life-span, durability, and unmatched aesthetics. Nu-Ray Metals is the industry leader in functionality, design and color options.

ADDITIONAL INFORMATION & PRODUCTS

ASTHETIC OPTIONS

ACCENT RIBS

Two, three, or four raised accent ribs strengthen metal panels to create a bold aesthetically pleasing panel.

NOTE: NRM-1000/1750/2000 has 2 lines - NRM-5000 has 3 lines - NRM-6000 has 4 lines

STRIATIONS

Striations are a great way to disguise "oil-canning," or the unsightly waviness in roof panels that often result from an uneven deck structure underneath.

FLAT PANEL

A smooth, flat surface with no extra stiffening, this classic look is only available in 24 gauge clip system products.

Noise Reduction System

Factory applied noise deadening material will reduce the sound of rain falling on your roof.

Condensation Stopper

Perfect for open framing projects like garages, barns and overhangs. This product is factory applied in our facility for ease of installation.

Snow Retention Systems

Partnered with Ace Clamp, we offer standard non-penetrating clamps for your project. Engineered systems also available.

Solar Panel Attachment Systems

Stocking the best non-penetrating solar clamps by Ace Clamp, mounting your solar array system has never been easier.

Underlayments

From Ice & Water shield to standard synthetics, we stock your underlayments needed to complete your project.
