

Fish Health Tips

Water

- Fresh clean water
 - adequate amount
- Weekly water changes, or adequate turnover/exchange
- Regular testing
 - Nitrate & Nitrite
 - Ammonia
 - Temperature
 - pH
- Occasional monitoring
 - KH
 - Chlorine
 - Copper (Inverts)
 - DO

Food

- Right type & amount
 - life stage
 - species
 - season
- Avoid wastage
 - “feed the fish, not the water”
- Check for spoilage
 - expiration dates!
 - air tight storage
 - correct temp.

Fish

- Avoid overcrowding
- Quarantine new fish
- Species compatibility
- Record behavior daily
- Regular (yearly) vet checkups
