Accessing SPARKS Technology
SMH – 004

1. Accessing the SPARKS Field Cameras from your phone or other device.

To access the cameras at the SPARKS club field, you must install the ZMODO app on your device (phone, tablet, or PC.)

1. Download and install the app from your favorite app store or the internet.
2. During the installation, the app will ask you if you want to share your data or files. Reply "No".
3. Once installed, go to the Login Page.
4. Select 'login' using the club's email address. The email address you must use is: sparksfield08@gmail.com and the password is **123456.**

Now you will be able to see what is happening at the field, who is there, what the weather is like, and what fun is being had. Enjoy the view.

2. Accessing the Internet via the SPARKS Hotspot

As a benefit of your membership, we are providing high speed internet access at the field. While using you phone, notebook, or laptop, at the field, you can check email, look up manuals or instructions, or participate in video conferences if you need to take a work break from your day of flying.

To connect, look for SPARKS when you search for local networks. The network password is **Kitzman!** Yes, include the exclamation point. Yes, we also have charging ports available. Just bring your cable. We may have someone donate a charging cable or two soon.

3. Communicate with other SPARKS members via the Discord App

Discord has become an essential way for us to connect with our SPARKS pals outside of meetings through text, voice, and even video chats. Unlike its unfortunate name, Discord provides a way for people with similar interests, like SPARKS members, to post messages and alerts, post events, request help with a problem, show your latest project, let others know you are heading to the field, sell an item, send direct messages, ask general questions, and discuss issues that may be bugging you.

To join the other members, you must first download and install the Discord App on your smart phone or another smart device.

1. You can download Discord from your favorite app store.
2. Please use your name for the user ID when you set up access.   Do not use a name like "Superman", OneWeasle, or "PunkDaddy." We must be able to identify you via your user ID and cross check it with the club and AMA Rosters.
3. Then, contact our president at president@sparksrc.com The president will verify you are on the SPARKS member roster and will grant you access to the SPARKS Discord servers. Again, a name like "BarferJet" isn't going to be on the official roster.

We think you will enjoy being more in touch with what's going on and getting to know everyone better. Please keep your discussions focused on the club and our hobby.
