CAPABILITIES STATEMENT

Core Competencies

Engineered Machining is a customer-focused precision manufacturing facility located in Longwood, Florida. Our 2,500 sq. ft. building contains a full CNC machine shop that uses cutting edge equipment and software to support the aerospace, medical, and military industries. We have two decades experience machining close-tolerance parts, components, and assemblies. Our company also offers secondary processing that includes cleaning, plating, paint, and heat treatment through our supplier network.

| Past Performance | Differentiators |
|--|---|
| <p>Our experience includes projects for the following companies:</p> <p>Lockheed Martin- Parts for the F35 Lightning simulator through DME Astronics Corp.</p> <p>Vero Biotech- Machined components for a COVID-19 related breathing device.</p> | <p>Clear and timely communication sets Engineered Machining apart from our competitors. Because we are a small shop we are adaptive and nimble in meeting customer needs. Job timing is critical and we continually work to exceed client expectations. We provide 24/7 low, medium, and high volume production of complex machined parts. Our goal is to become our clients' preferred supplier.</p> |
