Text:

The Immortal Life of Henrietta Lacks by Rebecca Skloot (You can obtain the book at your local library or simply report to the school during a summer school day for a copy.)

In 1951, a 30-year-old African-American woman named Henrietta Lacks entered Johns Hopkins Hospital to be treated for cervical cancer. In a matter of months she was dead, overcome by her cancer’s malignancy. Her cancer cells, however, would prove immortal—and change medicine forever.

The Immortal Life of Henrietta Lacks tells the story of Henrietta, her family, and her incredible cells. Tracking both the scientific advances owed to “HeLa” cells and the struggles of Henrietta’s descendants, author Rebecca Skloot leads readers through the history of cell research, the ethical implications of scientific study, and the human story of a poor and ailing family whose matriarch contributed to some of 20th-century science’s greatest achievements.

Directions for the Project: Students are to read the text and complete Part 1 and Part 2. For Part 1, the student will annotate every time they read 20 to 30 pages of the text. In doing so, they must find a quote, analyze the quote, and find a literary technique (e.g. simile metaphor, imagery, symbolism, irony, foreshadowing, motif, allegory, juxtaposition, point of view, etc.) in the text. The student must fill out two rows for every 20 to 30 pages they read of the text. For Part 2, students will write a review of the book.

In completing Parts 1 and 2 of the summer project, students should be prepared to present their information in class during the first week of the Fall 2021 semester.
**PART 1:** For every 20 to 30 pages you read, you must complete two rows below. Make sure to provide page numbers for every example or quote you list, and an analysis of the evidence you gathered below.
