

*"Systems with Integrity"*

# CERTIFIED HIGH OUTPUT LED LIGHTING, HEAVY DUTY POLES & CONTROL SYSTEMS®

We take pride and ownership of every project. Each product and person touching your project is SES Certified®. You receive 100% of the benefits of our proven process. We stake our name on your results.

Before we partner any project, SES Certified LED Lighting Consultants® independently test product integrity and certifications. With our strict standards in project management, procurement and logistics, we manage and communicate with our partners every step of the way.

SES Lighting has the expertise to partner in projects that have successful outcomes and certify your lighting to Illuminating Engineering Society Standards.

# SES LIGHTING REPRESENTS LEDTURE HIGH OUTPUT LED LUMINARIES

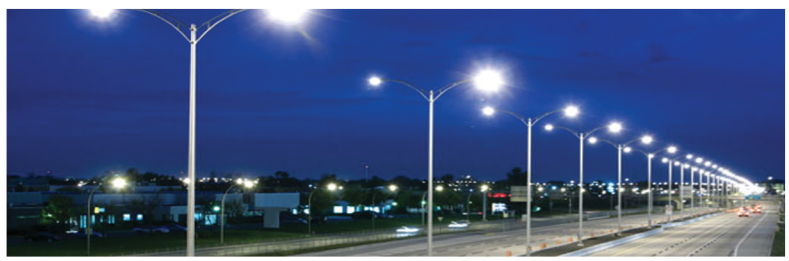

## Street Lighting

From 5,000 to 60,000 lumens, Ledture has a complete series of Street Lighting solutions. With a complete line of accessories and certifications, Ledture is able to meet the strictest of standards in local and federal qualifications.

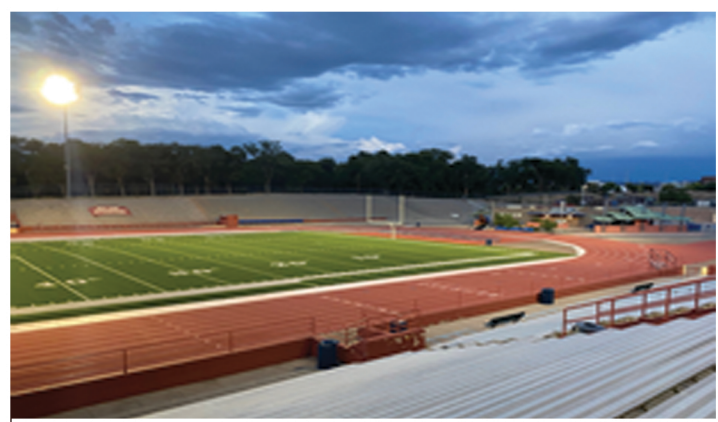

## Interstate Lighting

From 62,000 to 125,000 Lumens, Ledture exceeds the requirements for high-mast lighting solutions. With a variety of mounting solutions available and optics, many states have adopted Ledture fixtures for Interstate Lighting .

## Outdoor Sports Lighting

SES Lighting certifies your sports lighting conforms to the Illuminating Engineering Society Sports & Recreational Lighting Standards (RP-6-15), USTA and NCAA Standards for brightness and uniformity. Ledture can adapt to any pole height or layout to achieve a successful outcome.

## Indoor Sports Lighting

Ledture has indoor arena series of indirect and direct sports lighting available from 30,000 - 125,000 lumen packages. With over 20 optic lens types, Ledture can meet the highest standards in uniformity for college and professional sports.

## Stadium Lighting

With luminaires up to 276,000 lumens, RGBW capabilities and 20 different optical lenses available, Ledture out-performs all manufacturers in the stadium lighting applications and achieves the brightness and uniformity required for broadcast television and photography requirements.

## Industrial Lighting

Industrial factories, maintenance facilities, airplane hangers require the highest quality of high output lighting for important lighting applications. Ledture achieves this with the flexibility of lumen packages and optics.

# STRUCTURAL POLES CUSTOM ENGINEERED FOR YOUR APPLICATION

## Interstate & Street Lighting

From heights up to 175', SES Lighting can customize your street or interstate lighting project to any state's standard.

## Sports Lighting

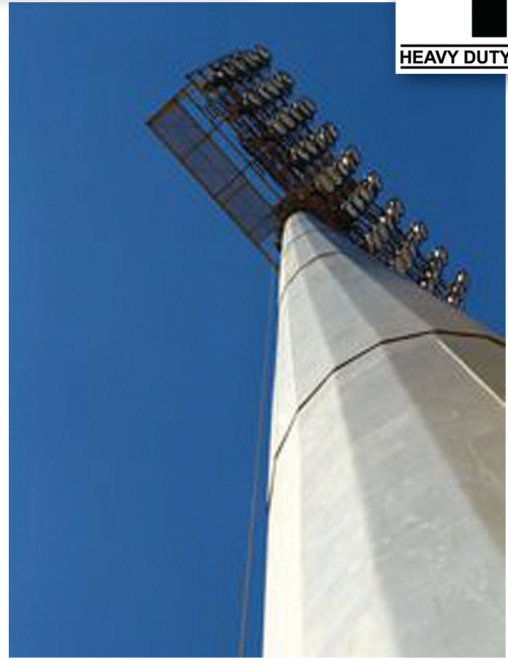

SES Lighting is proud to offer custom made poles for your football, soccer, baseball stadium or tennis court facility.

## Replacement & Retrofit Solutions

We can provide retrofit brackets and mounting arms for your existing poles in your conversion to LED luminaires. We can match your current color scheme with powder-coat finishes.

## A Winning Team for Your Turn-Key Project

With the SES Certified Products, Process, Engineers and Consultants, we will partner with you in a successful, turn key process that includes high quality, high-output LED Luminaires, Heavy Duty Poles and Lighting Controls.

## BE inCONTROL

## SPORTS LIGHTING CONTROL SYSTEMS

### Custom Programming & Solutions

Theatrical lighting control systems for sports lighting are being adopted nationwide now that driver platforms allow for wireless DMX integration. Our user-friendly system eliminates expensive specialized personnel for game time! Integrates seamlessly into LEDTURE luminaires with DMX, DALI, PMW or 0-10v drivers. Music, RGBW and customized scenes rival rock-star light shows at the touch of a button!

### Access On-Site or Remote Log-In

Access is not limited to on-site. The system offers a url based log-in for access for end-users, text-to-control for on-the fly changes or scene control. Full scheduling years in advance can be implemented.

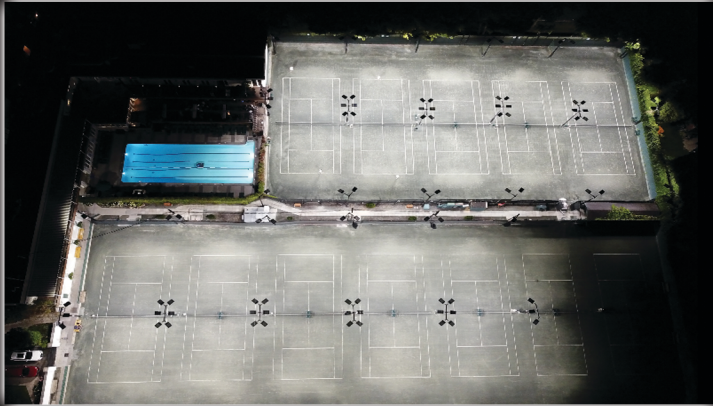

With Tennis Sports Lighting, we are able to achieve Class I - IV lighting levels in accordance with the Illuminating Engineering Society RP-6-15, USTA and Sports Builder Association Standards. The defining difference is the SES Certified Lighting Solution® which guarantees your project to have a successful outcome.

Class I Lighting, Toronto Lawn Tennis Club

Class II Lighting, River Oaks Country Club

Class III Lighting, Houston Country Club

Class IV Lighting, The Club at Rolling Hills
