**Date of Inspection: 7/2/2025**  
**Age of House: Size:**  
**Weather:**

## Report Introduction

We appreciate the opportunity to conduct this inspection for you! It's important to note that items listed on the summary page are not the entire report. Please carefully read your entire inspection report. Call us after you have reviewed your report if you have any questions. Remember, when the inspection is completed, and the report is delivered, we are still available for any questions you may have. Please feel free to contact us via phone or email.

Properties being inspected do not "Pass" or "Fail." The following report is based on an inspection of the visible portion of the structure; inspection may be limited by vegetation and possessions. Depending upon the property's age, some items like GFCI outlets may not be installed. This report will focus on safety and function; it is not a code inspection. This report identifies specific non-cosmetic concerns that the inspector feels may need further investigation or repair.

We recommend that licensed contractors evaluate and repair any concerns and defects for your safety and liability purposes. Note that this report is a snapshot in time, on the day of the inspection. We recommend that you or your representative carry out a final walk-through inspection immediately before closing to check the property's condition, using this report as a guide.

**Video In Your Report:** Your inspector may have included videos of issues within the report. If you are opening the PDF version of the report, make sure you view the PDF in the free Adobe Reader PDF program. If you're viewing the report as a web page, the videos will play in any browser, just click on any video within the report to start it playing.

Throughout the report, we utilize icons to make things easier to find and read. Use the legend below to understand each rating icon.

Satisfactory – Indicates the component is functionally consistent with its original purpose but may show signs of normal wear and tear deterioration.

Marginal – Indicates the component will probably require repair or replacement anytime within five years.

Poor – Indicates the component will need repair or replacement now or in the very near future.

Safety - Items with this rating should be examined immediately and fixed. Even though the item is marked as a safety issue, it could be a very inexpensive fix. Please make sure to read the narrative to understand the issue thoroughly.

Not Applicable/None - Items with this rating could not be fully inspected because access was blocked off or covered. Or the item did not exist at the home.

Our report contains a unique pop-up glossary feature. When you see words highlighted in yellow, hover your mouse over the term. The definition or a tip about the item will appear!

# Report Summary

The summary below consists of potentially significant findings. These findings can be a safety hazard, a deficiency requiring a major expense to correct or items I would like to draw extra attention to. The summary is not a complete listing of all the findings in the report, and reflects the opinion of the inspector. Please review all pages of the report as the summary alone does not explain all of the issues. All repairs should be done by a licensed & bonded tradesman or qualified professional. I recommend obtaining a copy of all receipts, warranties and permits for the work done.
