

Welcome to RCE! We've created a study plan that can be adapted for all students or any exam. Let us know what you need and we'll help build a customized plan just for you. **This one is for anyone studying for the AAPC CPC exam.**

Study guides are essential, but without a study plan you may waste time figuring out what to study and which resources to use. We'll handle that so you can focus on preparation.

This plan was developed by experienced managers, coders, and auditors who understand the stress and volume of material you need to review and learn. It includes a weekly schedule and tracker to help you spot error trends, choose preferred resources, and target key areas.

We can tailor this or any plan to your learning style and schedule. Contact us at education@reillycodingstrategies.com.

Use the link below to access the **CPC study plan**. Questions, suggestions, and feedback are welcome and help us improve our resources.
