## IMPORTANT SAFETY INFORMATION

**Indication:** Restylane® Contour is indicated for cheek augmentation and correction of midface contour deficiencies in patients over the age of 21.

Restylane Contour should not be used by people with severe allergies, particularly to microorganisms known as gram-positive bacteria, or by people with serious allergies to drugs that have previously required in-hospital treatment. This product should not be used by people with bleeding disorders and should not be injected anywhere except just under the skin. Restylane Contour should not be used in people with a known allergy to lidocaine, or by women who are pregnant or breastfeeding.

The most common adverse events after initial treatment include bruising, redness, swelling, pain, tenderness, and itching at the injection site. Use at the site of skin sores, pimples, rashes, hives, cysts, or infection should be postponed until healing is complete. In these instances, product use could delay healing or make skin problems worse.

This product should not be injected into the blood vessels as it may cause vascular occlusion, infarction, or embolic phenomena. Use with caution in patients recently treated with anticoagulant or platelet inhibitors to avoid bleeding and bruising.

Restylane Contour is available only through a licensed practitioner. Complete Instructions for Use are available at [www.RestylaneUSA.com](http://www.RestylaneUSA.com).
