Overview

Having spent the last 8 years learning and growing in a world blindsided by blockchain the Collision Token team has decided it is time to make a Token that is impossible to rug pool, rewards those who hold it and breaks its ground in the entertainment world. With liquidity locked for the first 18 months after launch the Collision Token Team cannot devalue the supply by pulling out the liquidity. Also with transactions larger than .5% (or 5 Trillion Tokens) failing instantly via the code of the contract whales will be prevented as well. What this all means is that Collision Token is for the long term holder who supports the future of the product. Paperhands beware.

Values

With an obsession for balance that would bring a tear to the Mad Titan's eye Collision Gate cares about the function of our product. With other modern card games and blockchains serving as the perfect example of what will and will not work we have a clearer road than most other gaming based NFTs while allowing both holders and engages to passively earn our Token. With this utility whether you want to teach yourself to code, play competitive card games, raise virtual pets or read books by undiscovered authors Collision is the place for it. We believe a community should grow, learn and have fun together while we simply make a way for you to grow your wallet while you do it.

Planned Features

Reflections App:
Track your BUSD reflections with the Collision Tracker
