## Market Value Adjustment

Any amount withdrawn in excess of the remaining free withdrawal amount is subject to a CDSC and MVA, if applicable. The MVA is an adjustment that may be applied if you make a partial withdrawal or fully surrender your contract before the end of the CDSC period. The MVA may be positive, negative or zero. If the MVA is negative, it could decrease the amount that you receive when you take a withdrawal or surrender. Conversely, if the MVA is positive, it could increase the amount you receive.

## Return of Purchase Payment Guarantee

If this option is elected and the contract is fully surrendered during the CDSC period, the contract owner will receive a return of principal, less previous withdrawals and applicable state taxes. The Return of Purchase Payment Guarantee is optional and not available with Market Value Adjustment.
