An annuity is intended to be a long-term, tax-deferred retirement vehicle. Earnings are taxable as ordinary income when distributed, and if withdrawn before age 59½, may be subject to a 10% federal tax penalty. If the annuity will fund an IRA or other tax qualified plan, the tax deferral feature offers no additional value. Qualified distributions from a Roth IRA are generally excluded from gross income, but taxes and penalties may apply to nonqualified distributions. Please consult a tax advisor for specific information. There are charges and expenses associated with annuities, such as surrender charges (deferred sales charges) for early withdrawals.

SecureOption Focus may pay an interest rate enhancement or bonus interest on certain purchase payments. Renewal rates may be reduced as a result of the interest rate enhancement such that the additional interest may or may not increase the total amount of interest your contract earns over the life of the contract. Whether or not it does depends on multiple factors, including the length of time you hold the contract. We consider many factors when setting interest crediting rates for your contract including the cost of the interest rate enhancement or bonus interest, sales commissions paid to sales representatives, administrative costs, and current investment and market conditions.

The guarantees are subject to the financial strength and claims-paying abilities of the issuing insurance company.
