Past Performance

Project Manager delivered visual flight training simulators satisfying department of defense requirements on time, on budget, on quality and on schedule.

Program Manager produced electronic titling solutions in multiple states. Developed custom software solutions, trained resources, optimized processes metrics and reporting per state's DOT requirements.

Quality Improvement leveraged DMAIC methodology to achieve Six Sigma quality for SAAS technologies.

Technical Analyst supplied business requirements, metrics and reporting expertise at Government financial agency.

Testimonial: "Their approach in working with the functional and technical team members resulted in a positive, respected and trusted advisor relationship which was recognized and appreciated by the CEO, the functional and technical team leads and members." Tim Cheek
