

Senator Favola wants to take away your parental rights!

Call Senator Favola NOW at 703-835-4845 and tell her you vehemently oppose SB 104.

WHAT IS SENATE BILL 104?

Senator Favola has pre-filed a bill (SB 104) for the 2020 Virginia legislative session that allows your minor child (any child under the age of 18 - that means even a 6, 8 or 10 year old!) to receive vaccinations WITHOUT your consent or knowledge.

She also wants to deem your minor child an adult for the purpose of accessing or authorizing the disclosure of medical records - which means your child can keep their medical records from you.

This bill is not about whether you choose some, all or no vaccinations. This bill is solely about taking away YOUR parental rights to make those decisions for your child.

Imagine what other parental rights the government will take away if we let this pass.

FAVOLA IS ANTI-PARENTAL RIGHTS

Senator Favola believes that the government knows our children better than we do. She thinks our minor children are capable of making potentially life-altering medical decisions on their own - without our knowledge or our consent.

If our minor children do not have the maturity and understanding to make informed choices about the consumption of alcohol, the use of cigarettes, to vote or to gamble, how are they supposed to have the knowledge and wisdom to fully understand the benefits vs. risks that come with all medical procedures including vaccinations? The answer is that they simply cannot. Without that understanding, they cannot give informed consent.

Parents alone are responsible for the care of their minor children. All decisions regarding their care should be ours. The government has NO business parenting our children.

WHAT CAN YOU DO?
