

# Aqua Gobbler™

**Revolutionary proprietary bacterial additive for reticulated aquaculture treatment which creates a healthier environment, reduces diseases, reduced algae, adds sparkle to water and visually cleans ponds, lakes, ornamental fish farms, tropical, marine aquariums and fish tanks.**

## Product Description:

Ecozyme Aqua Gobbler™ is a natural, safe and highly effective bio enzyme treatment for reticulated aquaculture environments which helps to add a beautiful sparkle to water and effectively cleans its target environment by enhancing the natural biological processes using a strain of proprietary enzyme producing bacteria in ponds, dams, marine and tropical aquariums.

## Current Global Challenges:

Global aquaculture is challenged around the world by poor water quality and the regular outbreak of diseases caused by bad pathogens. Using beneficial enzyme producing bacteria as a biological treatment agent has massive advantages to address aquaculture challenges by improving water quality and reducing diseases caused by bad pathogenic bacteria.

## Mode of Action:

The enzyme producing bacteria in Ecozyme Aqua Gobbler™ are physiologically robust and are formulated into a very stable commercial water treatment product which is easily tolerant to the harsh environmental conditions required in its application. Ecozyme Aqua Gobbler™ uses the mode of competitive exclusion to kill off bad pathogens. What this means is that the good bacteria in Aqua Gobbler™ display an exponentially higher growth rate and compete with, win and digest the food that bad bacteria need to survive. Aqua Gobbler™ essentially starves bad pathogens of their food source and they eventually die off. Aqua Gobbler™ functions across a wide range of physiological conditions, including salinity, pH and temperature. Optimum water temperatures significantly add to the performance Aqua Gobbler™ while relative fluctuations of water salinity and pH do not have a significant performance impact which adds greatly to its overall benefit and attractiveness in application.

## Product Features:

- Enhances water quality by reducing the concentration of C.O.D.'s ammonia, nitrite, nitrate and phosphates
- Reduces solids and organic wastes
- Pathogen inhibition action

- Reduces algae bloom proliferation
- Promotes healthy fish growth and lowers mortality and diseases
- Biological filter maturation

## Summary:

Ecozyme Aqua Gobbler™ will invaluablely greatly contribute to a healthier and visually cleaner aquatic environment, in residential but especially commercial environments where health, a high growth rate, high stocking density and greatly reduced diseases and low environmental pollution is required. Aqua Gobbler™ is essential for a rapidly growing, high-value industry, and the health and survival of countless fish species which is a critical requirement for the success of business and the preservation of our precious planet.

## Dosage & Directions:

- Ecozyme Aqua Gobbler™ should be added directly to the reticulated water system once a week. The dosage can be safely increased up to five times for extreme potency based on water conditions.
- Turns blue once it is mixed in water and will clear after passing through the filter system.
- 1 gram treats 1000 litres of water.
- Sufficient aeration and reticulation is essential.

## Storage & Packaging:

Store in a dry, cool and dark place.  
Packed in 500g bags.
