

Application to the Board of Governors of the Taconic Lake Association

For the Approval of a Construction Project

Required when a new building, out-building or dock is erected, a change in an existing building's footprint/roofline, septic system or dock is planned and a plumbing change that increases water consumption.

Name of Member:

Property:

Telephone:

Type of Construction Project:

Brief Description (Comprehensive plan to be attached):

Date Project is expected to begin:

Project completion date:

Contractors to perform work (Contractors and any subcontractors should be fully insured):

Member's Statement

I hereby request that the Board of Governors approve the above project as outlined. I understand that the Board may reject this application or ask for a modification to the application if it finds that it does not conform to the existing rustic conditions of the Lake as set forth in the Lake By-Laws. If the project is approved, I agree not to modify the project in any way without first receiving approval from the Board of Governors. I agree to follow the construction procedures established by the Board and the members of the Association. All contractors and individuals employed by me will be required to comply with procedures and I accept full responsibility for their actions if they do not. If Association property or the roadway suffers damages as a result of this project, I agree to repair the damage immediately upon request of the Board of Governors.
