

PIPING MODULES & SPOOLING

- Multi-Well Padsite Module Systems including Structural Steel, Pipe spooling, NDE, PWHT, Valves, Controls, Painting, Utilidor and Heaters. Fully assembled and loaded out for transport to site
- Plant Site Piping Module Assembly including Structural Steel, Pipe spooling, NDE, PWHT, Valves, Controls, Painting and Insulation
- Small and Large Bore Pipe spool fabrication, designed, fabricated and registered in accordance with ASME B31.3
- ATLAS can supply all materials or alternately the Client may choose to free issue the pipe, valves and fittings
- Full in-house engineering and design

ATLAS Nisku Manufacturing Facility

- 76,000 ft² under roof, located on 10 acres
- 16 Overhead Cranes, 32 ft under-hook
- 300 Ton weight capacity (20ft Dia x 150' S/S)
- Direct access to Oversized Shipping Corridor, Rail Spur
- Engineering Permits to Practice, AB, BC, SK
- Certifications: ASME, "U", "UM", CWB, ABSA
- COR Certified
