

8 rounds total between 2 mags; let a buddy load your mags (don't know when reload is coming); buddy also marks a number from 1 to 5 in each little square (shooter cannot look at target until they turn to perform the drill); start 3-5 yards from target facing away with gun in holster; on beep, turn, draw and shoot 3 into big square and then hit the little squares in numerical order with one shot each; reload when you have to and finish; no misses (halfway in or better is a hit); get the best time you can.
