Case Study

MULTI-FAMILY SENIOR HOUSING FACILITY REQUIRED A SECURITY SURVEILLANCE SYSTEM THAT PROVIDE FULL PROPERTY COVERAGE WITH MOTION DETECTION, ALERTS, AND REMOTE OPERATION.

“One of the biggest benefits to the EYE Tower AXIS Solution is mobility. If a resident calls the emergency number after hours, our property managers can pull up the video from my smartphones or laptop at home and see what’s going on” Tanya Petty, NHE Property Manager

THE RESULT >>

NHE-INC- now has a security system in place that truly provides peace of mind for residents and staff to support its mission to provide secure affordable housing for seniors.

The AXIS cameras assist in deter outsiders from sneaking onto the property and vandalizing. The Systems was able to detect in real-time to our 42 inch monitors, we strategically place at the property managers desk a potential theft within 3 mins. This incident provides the opportunity for the property manager to realize the value of live viewing, with remote viewing, motion detection and alerts on the EYE, WATCH Mobile Application.

Since 2018 installation incidents have been reduced by 95%

THE PROBLEM >>

NHE property Liberty Square Apartments prior to the EYE Tower security system has 30 or more incidents of tenant patio furniture stolen, maintenance shield and vandalized in 2015-18.

THE CHALLENGE >>

The cameras locations must be outside of tenant apartments and controlled by central office. Low-Speed Internet Service for Office. Outdated Office Computing Technology. The remote areas of property prevented cost-effective power options. Poor property lighting that has caused high theft incidents.

OUR SOLUTIONS >>

EVISIONEYE, a system integrator, and AXIS Partner created a comprehensive security surveillance design that incorporated:

Installed Solar Power Motion Lights in high Incident areas.

Installed 1 EYE Tower Steel Pole (24FT POE (Power-over-Ethernet) Power solution with POE Wireless Bridges for network connectivity. The HDTV AXIS P5635 enables staff to monitor the courtyard and front building entrances of apartments.

Installed 1 E-VISION-EYE Tower Steel Pole (45FT Solar Power) Power Solution with POE wireless Bridge for Network Connectivity. The HDTV AXIS P3717-PLE multidirectional camera with IP for 360 coverage. This solution allows for 4 cameras views with one IP Address. This solution enables staff to monitor the building’s perimeter, courtyard and apartment back entryways.

Designed and Installed a Separate Network Infrastructure for AXIS Camera Station Servers and provided necessary equipment

Our Quality Enhancement Program (Q.E.P), in which we provide full support, maintenance and enhancements during the first year allows us to provide additional system enhancements to our client at no charge. We provided the following: Additional Camera (AXIS M3106-LVE) for the tenant Laundry area and Installation. Free 90 Days Cloud Storage on our EYEWATCH Mobile Application and Network Wireless equipment for the office.
