Hello! We're Best Pest Solutions and we're here to help you get rid of your Ants. Pest control works more effectively and quicker if the tenant and the technician work together. By following these Do's and Don'ts, you can help us help you. Not following the recommendations can drag out the time it will take to resolve the problem, and may make issues worse:

Do	Don't
Try to keep surfaces clean (without cleaning areas where chemical was applied)	Mop for 2 weeks post-treatment
Keep up on keeping dishes clean and trashed taken out	<u>Use ANY over the counter treatments (foggers, raid, borax, alcohol, homemade treatments etc)</u>
Stop and control water leaks	
Call after 2 weeks if the problem continues	
Be patient	

Ant issues can vary widely in how long it takes for the treatments to take full-effect, and factors like the size and age of the colonies can effect how many treatments it takes. Ant treatments come with a 60 day warranty. Usually, you will see an increase in ant populations around 14 days post-treatment, and then they usually die off. If you are still having ants **after 14 days** call us for a warranty touch up. For severe ant issues, we also have ant bait stations available for an extra charge (Ask technician or call/text for more details).

If you have any questions, comments or concerns, feel free to reach out to us via call or text message at the number above, contact us through our website, or email us directly at bpsolutions22@gmail.com

We are eager to get this problem solved for you and look forward getting rid of your pests for good!
