

GoviEx Uranium Inc.

Modernizing Global Mining Finance with Microsoft Dynamics 365 Business Central

From a legacy on-premises ERP system to a unified cloud platform supporting operations across Africa and North America.

5 COUNTRIES SUPPORTED

Canada, Niger, Zambia, Mali & British Virgin Islands

ON-PREMISES TO CLOUD

SunSystems (on-premises) → Business Central (cloud)

LONG-STANDING PARTNERSHIP

Trusted ERP advisor for a complex international implementation

ABOUT GOVIX

GoviEx Uranium Inc. was a Canadian-based uranium development company with operations spanning Canada, Niger, Zambia, Mali, and a British Virgin Islands holding structure. As the company advanced major uranium projects internationally, it required a modern ERP platform capable of supporting multiple legal entities, remote teams, and global financial reporting.

INDUSTRY

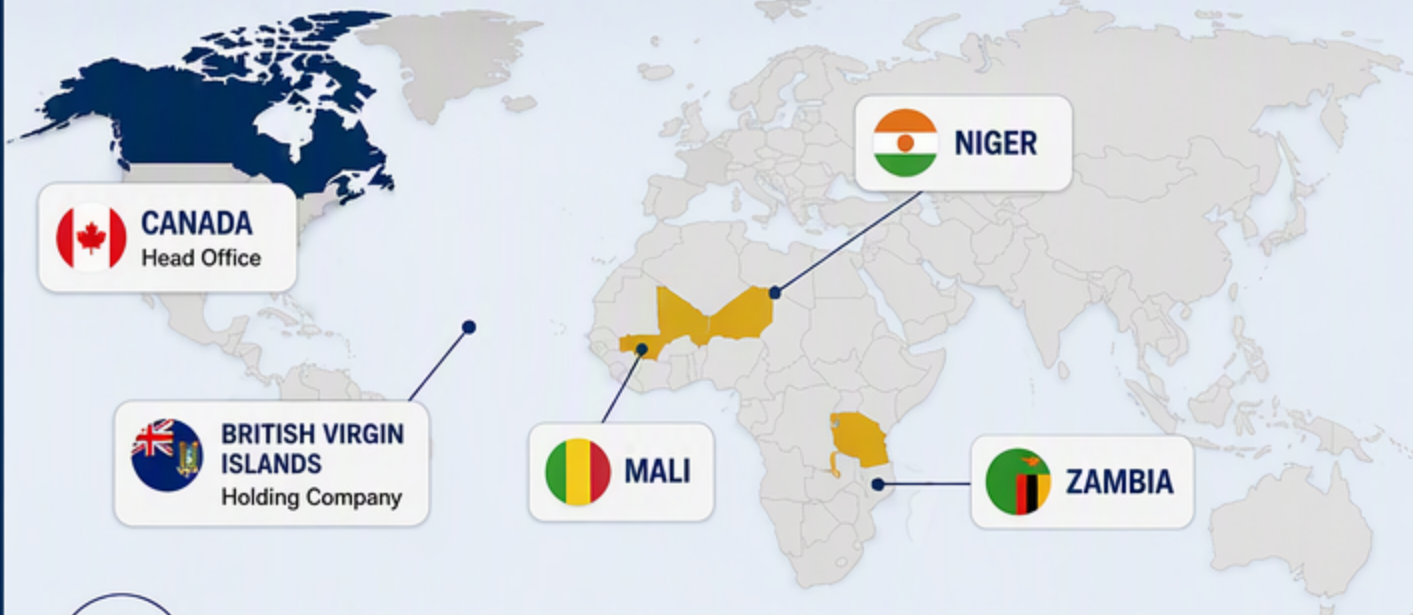

Mining & Metals

HEAD OFFICE

Vancouver, British Columbia, Canada

ONE ERP PLATFORM ACROSS MULTIPLE COUNTRIES

Business Central was implemented to support multiple operating entities and consolidation reporting across geographically dispersed teams, enabling a single source of financial truth regardless of location.

THE CHALLENGE

LEGACY TECHNOLOGY LIMITING GROWTH

GoviEx was operating with SunSystems, an on-premises financial management system. As operations expanded across multiple jurisdictions, the organization required a more scalable solution capable of supporting international collaboration, strong governance controls, and centralized reporting.

- Multiple legal entities
- International financial reporting
- Distributed finance teams
- Approval and governance requirements
- Limited visibility across operations

THE SOLUTION

A UNIFIED CLOUD ERP PLATFORM

Minerva implemented Microsoft Dynamics 365 Business Central as a centralized cloud ERP solution supporting GoviEx's international operations.

- | | |
|-----------------------------|----------------------------|
| ✓ General Ledger | ✓ Financial Consolidations |
| ✓ Accounts Payable | ✓ Workflow Approvals |
| ✓ Accounts Receivable | ✓ Role-Based Security |
| ✓ Cash Management | ✓ Global Cloud Access |
| ✓ Multi-Currency Management | ✓ Reporting & Analytics |

RESULTS

BUSINESS BENEFITS

FROM ON-PREMISES TO CLOUD

Replaced the legacy on-premises SunSystems environment with Microsoft Dynamics 365 Business Central.

IMPROVED GLOBAL VISIBILITY

Created visibility across multiple companies and jurisdictions through centralized reporting and consolidated financial management.

STRONGER GOVERNANCE

Approval workflows and security controls improved financial oversight across international operations.

SCALABLE FOUNDATION

Established an ERP platform capable of supporting continued organizational growth and evolving business requirements.

INTERNATIONAL ERP EXPERTISE FROM BRITISH COLUMBIA

Building on a long-standing relationship with GoviEx, Minerva Business Systems, Inc. successfully implemented Microsoft Dynamics 365 Business Central across multiple legal entities operating in Canada, Niger, Zambia, Mali, and the British Virgin Islands. The project demonstrates Minerva's ability to deliver Business Central solutions for mining organizations operating across multiple countries, jurisdictions, currencies, and reporting structures. The implementation included financial management, consolidation reporting, workflow approvals, role-based security, multi-currency processing, and centralized access through Microsoft Dynamics 365 Business Central for geographically dispersed teams.
