

**EcoToxicology Laboratory Technician:**

EcoAnalysts is currently seeking a **Full-Time Laboratory Technician** to join our Port Gamble, WA team of aquatic toxicologists. The Port Gamble Environmental Laboratory is a consulting laboratory focused on performing aquatic toxicity testing on water, sediment, and other matrices. **The primary responsibilities for this position will include general lab maintenance activities, aquatic toxicology testing support, and cleaning of labware. This individual will be expected to work approximately 32 - 40 hours per week. An adjusted schedule to include weekend days will be required.**

Duties associated with this role may include assisting with any aspect of the laboratory including (but not limited to): water quality measurements, maintaining of test organism cultures, and data entry. Coursework and a strong background in biology and chemistry and are desirable. Students working toward a degree in Marine or Aquatic Biology, Environmental Studies, Environmental Toxicology or related field are desired. Previous experience in a laboratory setting and experience with Microsoft Word and Excel are preferred, but not required. On the job training will be provided; however, successful applicants should be knowledgeable with basic information regarding animal care and husbandry, water quality parameters and characteristics, and principles of aquatic research and laboratory testing.

Key personal qualifications for this position include good interpersonal and communication skills, reliability, attention to detail, flexibility in schedule, the ability to follow written and verbal directions, and the ability to work both independently and within a team setting. A positive attitude is an absolute necessity.
