

Hello Cake Decorating Families,

Welcome To The Kitchen! I am thrilled to be working with you and your child in my kitchen classroom this year – the Decorating classes are always such fun to teach. I truly enjoy seeing each student's individual creativity. I will have all the supplies and ingredients needed for each week's lesson. The only thing your student may want to bring is an apron to protect their clothing.

In Cake Decorating 2 we will be working with buttercream and fondant as well as some of the current trends in decorating tools and supplies like wafer paper, edible images, edible lace, stencils and embossers.

I structure the classes using the first 10 minutes for gathering supplies. The next 30 minutes of class will be instruction and time to practice the skill for that week. The final 10 minutes will be slated for clean up. I teach all of my Decorating classes back to back so I really will be counting on the students to keep my time structure in mind and be diligent about cleaning up their work station each week. Students are welcome to take along what they create and I will always provide take home containers for our projects.

I will be teaching all my classes in the Worship Center Kitchen. You will find me in the building to the right of the main building where most of the T.E.A.C.H. classes are held. The entrance is along the side.

I invite you to contact me any time that you have a question regarding the class. I am fully available to you. If your child has a particular challenge be it academic, social, or emotional that needs to be taken into consideration in the classroom, please feel free to share this with me. Knowing this I can make the appropriate changes so your student is as comfortable as possible. I also would like to be aware of any food allergies your student may have.

I look forward to meeting you either at Trinity's Open House or when school begins.

Blessings,

April Reinhart
