

Welcome to Fun with Fundamentals! I'm excited to welcome your children to a hands-on life skills class where learning essential skills will be both fun and engaging. Throughout the co-op year, we'll cover a variety of practical skills from tying shoes and making beds to even learning basic academic skills like understanding calendars and telling time. This class is designed to be interactive and enjoyable, making learning seamless for your child.

Occasionally, we will incorporate food treats into our lessons. Please inform me of any food allergies your child may have.

The class fee includes all necessary supplies. However, there will be times when I'll request that you provide household items for your child to practice with. For instance, when we start learning to tie shoes, if your child has lace-up shoes, it would be beneficial for them to bring them in.

This class operates as a "parent-free zone" to maintain focus and minimize distractions during our activities. You are welcome to peek in through the door window at any time.

I regret that I won't be available for the open house, but I eagerly look forward to meeting everyone in August!

Blessings,

Mrs. Liana
