## Class Description

Lego offers so many learning opportunities. Playing with building blocks helps kids with math concepts, engineering, communication, as well as simpler things such as colors and shapes. Lego challenges will be presented for small groups to complete. This is a great way to encourage learning and build friendships. This class is designed to be full of fun, engaging, student led activities that promote interactive play and social skills as well as team building and engineering concepts. Students will be able eat their snack/lunch during this class.

*\*An in-class field trip with [Bricks 4 Kidz](#) will be planned before the end of the year. Cost is approximately \$8/student.*

*\*A field trip to [Lego Land](#) will be planned for Friday April 25, 2025 or May 2, 2025 if most of the class is interested.*

## Communication

I will send emails, when necessary, but most of the time we will communicate via the Remind app. To join our class, download the app and go to <https://www.remind.com/join/lego20242> or join via smartphone by texting to 81010 and text this message: [@legos20242](#)

**\*\*\*This is the best way to reach me. If you send me an email, please send a text through Remind to notify me. I have 5 email accounts I check weekly not daily.**

## Homework/Grades

This is a homework and grade free zone.

## Materials

All materials will be provided; however, Lego donations are always appreciated.
