Class Description

Math is all around us. It is a universal language around the globe. Math can explain God's perfect hand in creation. Then why do so many people young and old groan when the topic of math is discussed?

Math really can be fun to learn if it is presented in a natural way just as any spoken language is. My goal for this class is to present math concepts in a fun and meaningful way that will ignite a love and understanding of math, as well as an increased confidence in math performance. Math should be hands on, relevant, and fun. Topics we will focus on are place value, addition and subtraction with regrouping, multiplication, division, fractions, decimals, percents, algebraic thinking, how to solve word problems, and applying concepts to real world activities. If the class agrees, we will create a math escape room for other classes to complete. An end of the year math project will be determined by students.

Homework

This class is a homework free zone unless most students vote otherwise.

Communication

I will send emails when necessary. Most communication will be done through the Remind app.

To join via online go to <https://www.remind.com/join/4kf4hf8>

To join via mobile app, send a **text to 81010** and text the message: **@4kf4hf8**

*****This is the best way to reach me. If you send me an email, please send a text through Remind to notify me. I have 5 email accounts I check weekly not daily.**

Materials

All materials will be provided. Donations are always appreciated.
