## CORE:

*Classes are taught from a Biblical worldview to grade level of curriculum  
place student according to their academic grade level.  
Language Arts, Math, Science & Social Studies*

## CORE PA:

*The Principle Approach to education is a method of teaching and learning that emphasizes a biblical worldview and the understanding that God's Word is the foundation of all knowledge. It's called the "Principle Approach" because it teaches students to reason from principles found in the Bible to every subject and area of life.*

### Key Features:

*Biblical Principles, Providential History, Individuality, Self-Government, Notebook Method, Leading Ideas & Vocabulary, Christian Scholarship*

### Origin:

*Developed and popularized in the 20th century by Rosalie Slater and Verna Hall, who believed America's founding education was based on biblical principles, and sought to recover that model.*

### What it Looks Like in the Co-Op:

*Students study Scripture alongside literature, history, science, and math.  
Teachers guide students in reasoning from biblical truth to real-world applications.  
Emphasis is on character, purpose, liberty, and a biblical view of man and government.*
