

MARCH NEWSLETTER

Saskatchewan Respiratory Therapy Education Committee

Primary Care Respiratory Therapy

**THANK YOU FOR SUPPORTING OUR FIRST NEWSLETTER.
BY REQUEST THIS MONTH WILL BE HIGHLIGHTING THE
ROLE OF RESPIRATORY THERAPISTS IN PRIMARY CARE.**

- What's the role of a primary care respiratory therapist? Chronic disease education and management, home ventilation, management of patients requiring oxygen in the community, administration of vaccines, spirometry and pulmonary function testing, sleep disorder screening, testing and management, as well as pulmonary rehabilitation. As time goes on the role of RT's in the community continues to expand.
- Disease management programs employing respiratory therapists have reported improvements in resource utilization, readmission rates and hospital length of stay
- May 2, 2024 a National Competency Framework for Primary Care Respiratory Therapy was published. This is a huge step forward for the profession.
- What's next in community care for RTs? Telehealth is a great way to improve patient's access to health care and to help reduce rates of readmission.
- It's hard to summarize all the work these amazing RT's do in a day. This issue is just scratching the surface of their scope and we look forward to future issues that take a deeper dive into their role.
