- High School Robotics
- Vocational Rehabilitation Employer of Choice for "On The Job Training" Participants

# HILSIA "TATIANA" FERNANDEZ

## Congressional Exploratory Committee FL 7

Dear Supporter,

I'm interested in your feedback about the current congressional candidate pool and their take on the many issues that affect Florida. Our Hispanic community is growing and therefore, we must have more representation to bring quality leadership to Central Florida. It is of my utmost interest to make sure that the people have a vote that counts, and works for them and their interests. Local Businesses must be supported so that they can offer better jobs with pay that covers the needs of the employees. The education of young people must be covered by the aid that is already approved in Washington for the local Universities, Colleges and High Schools. Teacher Pay has to be addressed proactively to keep our educational quality. We need to work with community leaders, and give them the tools they need to provide services to the community. Awareness of our problems is NOT enough. We have to provide practical solutions that bring immediate relief to the issues that concern us all.

If the Democratic Party supports me, It would bring new blood to our Congress, and we can put one more vote to supporting our vision for the future.

I am very proud "Puertorriqueña" that have experienced multiple years of exposure to other cultures, Regions and lived in Many Places of this great United States. During my years of business I have been also traveling to other countries, like Mexico, Venezuela, and Colombia and have many friends in Bolivia, Panama, Costa Rica, and Nicaragua. Exposure to these rich cultures closely have taught me that many come that come here, come to work and they do work hard for their children which treasure their school years and can't wait to give their best to our society. We are all Hispanics, we are united by the same language, but in Florida, We can all become the American Dream.

I'm looking forward to engage with my fellow Floridians and get their input in the most pressing issues of the moment, such as:

- Education
- Small Business Development
- Veterans Support
- Housing- Rental Affordability
- Housing Insurance Instability
- Employment Stability
- Sub-Employment in the Community
