

What are SIPs?

Structural Insulated Panels, or SIPs, are wall panels created with a Fiberglass Reinforced Ceramic Cement Board (FRCC) and polyfoam. These wall panels are pre-fabricated and are fire, water and mildew resistant.

SIP PANEL

PARTNERSHIP PRODUCTS

Innovative Concepts Group LLC is a proud partner with Rok-On Building Systems. Our aim is to highlight, market and utilize innovative products that will help the construction industry move forward in a more affordable and sustainable way.

STRUCTURAL INSULATED PANELS

PARTNERSHIP PRODUCTS

Time-Lapse of fire test on SIP Panel

ROK-ON™ SIPs are made of Magnesium Oxide, Magnesium Chloride, Fiberglass non-woven mesh, Talc, and other non-hazardous fillers.

They have been tested to over 63 ASTM tests for fire, energy and structural performance with outstanding results.

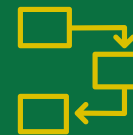

Benefits of using SIPs over stick-frame:

High R-Value
Fire, Mold and Water resistant

Constructed and finished in prefabricated environment

Less steps to build - lower labor costs

Recycle-friendly materials
