BREWERY-DISTILLERY-WINERY CATALOGUE

Hello, and thank you for having an interest in boosting your merchandise and retail brand presence with our services. We are On The Rox, our teams specialize in custom products for your business. Established in 2015, On The Rox was started to provide high quality American made products to share a smile and a laugh with friends, family and customers across the world. An Indiana-based, Veteran operated, family business, we take pride in doing things right the first time. 100% of our products are hand inspected and only the very best are certified for resale ready and or gift packaging. What separates us from the rest are our abilities to present you with merchandise, products, and marketing materials quickly and efficiently. We can provide anything from gift shop products to the drinkware and barware your company uses daily. Why choose us? Our highly decorated design and production teams execute their work exclusively in house. Start to finish procurement, no middleman, no overseas production, no wait times, and no supplier setbacks, just to name a few reasons. We take pride in our machines, team members, and capabilities.

Our ISO-9001 quality standards are among the toughest in the manufacturing industry. We actively practice the strictest quality assurance and adherence programs. We coordinate with our U.S.A based suppliers to source the finest raw material there is available. We have a simple motto to follow at On The Rox, *quality concerns don't leave the facility, period.* Our Environmental, Health, and Safety Procedures are second to none. Our team members care about the impact we make in our community and manufacturing atmosphere. Although we are not a medical grade manufacturing facility we model our operations after such. Organization, cleanliness, and efficiency are required processes to each and every operation we have.

Throughout the next few pages you will see a line sheet of products we have to offer specifically for your operation. All of these products are customized and decorated in our facilities. **For in stock items our lead times are typically 5-7 days. Expedited production is available upon request.** Our production teams maintain openings specifically for pop up orders and last minute jobs. We purposely do this to combat stop-loss and fallout on your part. On The Rox understands that in this world sometimes planning and product forecasting just isn't possible. Thorough production planning gives us the opportunity to conduct a variety of research on a plethora of products to better serve our customers. That being said, if you have an idea or request we will always entertain it.

We have a technologically advanced graphics team in our arsenal. Creating something from nothing is what we are best at. Don't have a logo? No problem, we can sit down and make one for you. No high resolution images? No worries, we can fix them. Need some custom alteration? Too easy. Need listing images and lifestyles? No problem. Our digital graphics designers can vectorize most if not anything you can throw at them with speed and attention to detail. For all of our own artwork, we do not use outside or freelance designers. We conduct our own photoshoots, coordinate sets, and render all of our own images in house, same day. If you require these services we always give you all the files when we complete them that way you have them for any future products you may need elsewhere. **Our 1 time rework design fee** is cost effective and justifiable or your money back! All "print ready" artwork files should be either an EPS or AI working file and set to 300 DPI minimum. **ALL ITEMS NEED TO BE VECTORIZED OR YOU WILL BE CHARGED A DESIGN FEE.** All other files (jpg, pdf, etc) will be charged a design fee for recreation/vectorizing. 300 DPI is the print standard for high resolution images, vectors, etc. Anything below that may come out pixelated & look low quality.

11 Ounce "Rox" Cocktail Glass, Engraved (Gold Rim or Standard)
3.25" X 3.5"

A heavy based cocktail glass available in standard rim or gold rim. Perfect for any signature cocktail recipe. Laser engraving establishes the boldness of the glass itself.
