Penguins are seabirds.
They eat fish and other seafood.

They use their wings to travel underwater,
but they cannot travel in the air.

Penguins lay their eggs and
raise their babies on land.

Most penguins lay two eggs per year.
The father and mother take turns keeping
the eggs warm, and the chicks warm after hatching.

Penguins have webbed feet used for paddling in the water. They cannot walk well, so they waddle.

NORTHERN HEMISPHERE

SOUTHERN HEMISPHERE

Penguins live only in the Southern Hemisphere of the world: Antarctica, New Zealand, Australia, South Africa and South America.
