Strains with the same Top Three Terpenes in order of dominance are about 85% “like” other strains with the same terpene profile

Patients

Match strains to medical conditions

Easily choose between Indica (nighttime) and Sativa (daytime) strains

Compare terpenes in flower, vape carts, and other cannabis products

Budtenders

Helps answer the question “What strain do you have that is like ...?”

Shows patients how to match strains with medical conditions

Helps patients avoid unwanted terpenes

Limonene – Citrusy & sweet

Oranges, lemons, limes, mint, apples

Anxiety, stress, depression, digestion & chronic pain

MAC 1, Dosidos, Pure Michigan, Lemon Slushie

Myrcene – Earthy & musky

Hops, lemongrass, mangoes, carrots

Anxiety, stress, pain & inflammation

Purple Haze, White Widow, OG Kush, AK-47

Pinene – Piney & woody

Pine trees, rosemary, dill, parsley

Respiratory conditions, arthritis & chronic pain

Tropicana Banana, End Game, Louis XIII, Sun Cake

Caryophyllene – Peppery, pungent & spicy

Black pepper, cinnamon, oregano

Pain, inflammation, anxiety & depression

Donkey Kong, Slurricane, Wedding Cake, Biscotti

Linalool – Floral & lavender

Basil, thyme, rosemary, lavender, rose

Anxiety, depression, insomnia & pain

Granddaddy Purple, Grape Ape, Bubba Kush

Humulene – Earthy & woody

Hops, coriander, sage, ginger, tomatoes

Arthritis, obesity, fibromyalgia, IBS & pain

Girl Scout Cookies, Headband, Chemdawg

Bisabolol – Floral & sweet

Chamomile, tea trees, basil, ginger

Eczema, chronic pain, arthritis & fibromyalgia

Harlequin, Gary Mac, Jungle Cake, Moon Glow

Terpinolene – Herbal & floral

Rosemary, dill, lilacs, nutmeg

Insomnia, panic attacks, depression & pain

Jack Herer, Super Lemon Haze, Durban Poison

ALS (Lou Gehrig's Disease)

Muscle Spasticity & Pain Relief

THC and CBD help reduce muscle stiffness, spasms, and associated pain which improves mobility and comfort

Neuroprotection & Slows Disease Progression

CBD, CBG, and THC have neuroprotective properties, potentially slowing the degeneration of motor neurons

Improves Sleep & Reduces Anxiety

ALS patients often suffer from sleep disturbances and anxiety, and cannabis (especially with linalool and myrcene) promotes relaxation and better sleep

Cannabinoids

- THC - Reduces muscle spasticity, pain, and improves appetite
- CBD - Anti-inflammatory, neuroprotective, and helps balance THC's effects
- CBG - Promotes neuroprotection, reduces inflammation, and may support motor neuron health
- CBC - Enhances pain relief and neuroprotection
- THCV - May help with muscle control and reduce involuntary spasms

Terpenes

- Myrcene - Muscle relaxant, pain relief, and promotes better sleep
- Linalool - Calming, anti-anxiety, and reduces nerve pain
- Caryophyllene - Anti-inflammatory and pain management
- Limonene - Mood-enhancing, anti-depressant, and digestive support
- Pinene - Helps with cognitive function and has anti-inflammatory effects

Recommended Products

- Full-Spectrum Tinctures - Long-lasting relief and neuroprotection
- RSO (Rick Simpson Oil) or High-THC Concentrates - Helps with pain, muscle spasms, and sleep
- Edibles/Pills - Prolonged relief from muscle stiffness and discomfort
- Topicals - Provides localized relief for muscle pain
- Inhalable Flower or Vape - Fast-acting relief for spasms, anxiety, and sleep issues

Alzheimer's Disease

Neuroprotection & Slows Disease Progression

CBD and THC have neuroprotective properties that help reduce beta-amyloid plaque buildup which is associated with Alzheimer's progression

Reduces Anxiety, Agitation & Mood Swings

Promotes relaxation and mood stabilization to help with restlessness, agitation, and aggression

Improves Sleep & Appetite

Sleep disturbances and appetite loss are common in Alzheimer's patients, and THC and myrcene-rich strains help improve sleep, while THC stimulates appetite

Cannabinoids

- CBD - Anti-inflammatory, neuroprotective, and helps slow cognitive decline
- THC - Reduces beta-amyloid plaque formation, improves appetite, and reduces agitation
- CBG - Promotes neuroprotection and may support brain health
- CBC - Enhances cognitive benefits and mood regulation
- THCV - May help with motor control and reduce inflammation in the brain

Terpenes

- Linalool - Calming, anti-anxiety, and potential neuroprotective effects
- Caryophyllene - Anti-inflammatory and may help with brain function
- Pinene - Supports memory retention, alertness, and cognitive function
- Limonene - Uplifting and stress-relieving
- Myrcene - Helps with relaxation, sleep, and reducing restlessness

Recommended Products

- CBD/THC Tinctures - Provides neuroprotection and mood regulation
- RSO (Rick Simpson Oil) or Full-Spectrum Cannabis Oils - Potent option for anti-inflammatory and neuroprotective effects
- Edibles/Pills - Long-lasting effects for cognitive support and relaxation
- Topicals - Helps with muscle relaxation and pain relief
- Inhalable Flower or Vape (Pinene & Linalool-Rich Strains) - Fast relief for agitation, stress, and mood swings

Autism

Reduces Anxiety & Social Stress

CBD and limonene-rich strains help ease anxiety, stress, and overstimulation

Improves Emotional Regulation & Mood Stability

CBD, THC, and CBG interact with neurotransmitters to reduce mood swings and irritability

Supports Focus & Cognitive Function

Pinene and THCV may help with attention and sensory processing issues

Cannabinoids

- CBD - Reduces anxiety, supports emotional regulation, and improves focus
- THC (low doses) - Helps with relaxation, reduces “meltdowns”, and improves sleep
- CBG - May support mood balance, reduce hyperactivity, and provide neuroprotective benefits
- CBC - Enhances mood regulation and emotional stability
- THCV (low doses) - Helps with focus, impulse control, and sensory processing

Terpenes

- Linalool - Calming and anti-anxiety properties, promotes relaxation
- Limonene - Uplifting and mood-enhancing, helps with emotional regulation
- Myrcene - Sedative effects, useful for relaxation and sleep
- Caryophyllene - Reduces stress and inflammation
- Pinene - Supports focus, cognitive function, and mental clarity

Recommended Products

- CBD-Dominant Tinctures - Effective for anxiety and mood balance
- Full-Spectrum Oils - Long-lasting symptom relief
- Edibles/Pills (low-THC) - Helps with anxiety and emotional regulation
- Topicals – Provides calming effects without psychoactivity
- CBD/CBN Sleep Aids - Helps with sleep disturbances

Cachexia (Wasting Syndrome)

Stimulates Appetite & Prevents Weight Loss

Promotes an increased appetite and improves food intake

Reduces Nausea & Improves Digestion

CBD, THC, and CBG help reduce nausea and improve gut function making it easier to keep food down

Enhances Energy Levels & Reduces Fatigue

Limonene and THC helps boost energy and combat physical weakness

Cannabinoids

- THC - Strong appetite stimulant, nausea reducer, and pain reliever
- CBD - Helps with nausea, gut health, and inflammation
- CBG - Supports appetite stimulation and may help with gut motility
- CBC - Works with THC and CBD to enhance appetite and digestion
- THCV (low dose) - Helps with energy, balance, and metabolism regulation

Terpenes

- Myrcene - Sedative and appetite-stimulating effects
- Limonene - Uplifting, helps with mood and digestion
- Caryophyllene - Anti-inflammatory, helps with gut health and stress
- Linalool - Reduces anxiety and promotes relaxation, making eating easier
- Pinene - Supports respiratory function and improves energy levels

Recommended Products

- THC-Dominant Tinctures - Fast-acting appetite stimulation
- RSO (Rick Simpson Oil) or Full-Spectrum Extracts - Potent, long-lasting support for appetite and energy
- Edibles/Pills - Provides extended relief for nausea and appetite suppression
- CBD/THC Vapes or Inhalable Flower (high-THC, myrcene-rich strains) - Immediate appetite enhancement

Chronic Pain Despite Opiate/Pain Medication

Enhances Pain Relief & Reduces Opioid Dependence

THC and CBD interact with the body's endocannabinoid system to boost pain relief, potentially allowing for reduced opioid dosage.

Reduces Inflammation & Neuropathic Pain

Cannabinoids like CBD, CBG, and CBC help decrease inflammation and nerve-related pain which opioids may not fully address.

Improves Sleep & Mental Well-Being

Sedative terpenes and cannabinoids (CBN, myrcene, linalool) promote restful sleep and reduce stress.

Cannabinoids

- THC - Potent analgesic, binds to CB1 receptors to reduce pain perception
- CBD - Anti-inflammatory, supports opioid tapering, and reduces nerve pain
- CBG - Enhances pain relief, reduces muscle tension, and fights inflammation
- CBC - Works with THC and CBD for enhanced pain control and inflammation reduction
- CBN - Sedative effects help with nighttime pain and sleep disturbances

Terpenes

- Caryophyllene - Strong anti-inflammatory and analgesic
- Myrcene - Muscle relaxant, sedative, and pain-relieving properties
- Linalool - Calming, anti-anxiety, and muscle relaxant effects
- Pinene - Helps with inflammation and may improve airflow and alertness
- Limonene - Mood-enhancing, helps with stress and depression

Recommended Products

- Full-Spectrum Tinctures - Fast-acting, easy to dose, and effective
- Full-Spectrum Oils - Potent, long-lasting relief for pain and inflammation
- Edibles/Pills - Provides extended pain relief without frequent dosing
- Topicals - Apply directly to painful areas for localized relief
- Inhalable Flower or Vape - Immediate relief for breakthrough pain.

Chronic Pain

Reduces Inflammation

Cannabinoids interact with the body's immune system to decrease inflammation, helps with arthritis, neuropathy, and autoimmune pain

Modulates Pain Perception

THC binds to CB1 receptors altering how the brain processes pain and making it feel less intense

Relaxes Muscles & Eases Spasms

THC and CBD helps reduce muscle spasms and tension

Cannabinoids

- THC - Blocks pain signals at the nervous system level and reduces inflammation
- CBD - Anti-inflammatory, neuroprotective, and helps ease pain
- CBG - A potent anti-inflammatory and muscle relaxant, beneficial for nerve and inflammatory pain
- CBC - Interacts with TRPV1 receptors which play a role in pain perception and enhances the effects of THC and CBD
- CBN - Has sedative and muscle-relaxing properties

Terpenes

- Myrcene - Enhances THC's pain-relieving effects
- Caryophyllene - Binds to CB2 receptors providing powerful anti-inflammatory and analgesic properties
- Linalool - Calming agent and helps with nerve pain
- Pinene - Helps reduce inflammation, supports respiratory function, and counteracts some THC-related cognitive fog
- Humulene - Pain-relieving and anti-inflammatory effects

Recommended Products

- Tinctures - Fast-acting and long-lasting, taken under the tongue
- Topicals - Good for localized pain relief
- Pills/Edibles - Long-lasting effects, ideal for all day relief
- Suppositories - Strong absorption with long-lasting relief, effective for severe abdominal pain, pelvic pain, and menstrual cramps

Crohn's Disease & Ulcerative Colitis

Reduces Inflammation in the Gut

CBD and THC interact with the endocannabinoid system to reduce gut inflammation and promote intestinal healing

Manages Pain & Cramping

Helps relieve abdominal pain, muscle cramping, and gastrointestinal discomfort by interacting with pain receptors and reducing spasms

Appetite Stimulation & Nausea Relief

THC stimulates appetite and reduces nausea

Cannabinoids

- CBD - Anti-inflammatory, supports gut health, and helps regulate the immune system
- THC - Pain relief, appetite stimulation, and anti-nausea effects
- CBG - Antibacterial, reduces gut inflammation, and promotes intestinal healing
- CBC - Enhances anti-inflammatory and pain-relief effects
- THCV - Helps regulate gut motility and inflammation

Terpenes

- Caryophyllene - Anti-inflammatory and pain-relieving properties, directly interacts with CB2 receptors in the gut
- Limonene - Aids digestion, reduces nausea, and provides stress relief
- Myrcene - Helps with muscle relaxation, cramping, and pain relief
- Linalool - Anti-anxiety and anti-inflammatory, helps with gut discomfort
- Pinene - Supports respiratory function and has anti-inflammatory effects

Recommended Products

- CBD/THC Tinctures - Fast absorption and helps reduce inflammation
- RSO (Rick Simpson Oil) or Full-Spectrum Cannabis Oils - Potent anti-inflammatory effects and symptom relief
- Edibles/Pills - Long-lasting relief for inflammation and digestive issues, but may be difficult for some patients
- THC/CBD Suppositories - Direct absorption for localized gut relief
- Inhalable Flower or Vape (Caryophyllene & Limonene-Rich Strains) - Provides quick relief for nausea, pain, and stress

Crohn's Disease & Ulcerative Colitis

Reduces Inflammation in the Gut

CBD and THC interact with the endocannabinoid system to reduce gut inflammation and promote intestinal healing

Manages Pain & Cramping

Helps relieve abdominal pain, muscle cramping, and gastrointestinal discomfort by interacting with pain receptors and reducing spasms

Appetite Stimulation & Nausea Relief

THC stimulates appetite and reduces nausea

Cannabinoids

- CBD - Anti-inflammatory, supports gut health, and helps regulate the immune system
- THC - Pain relief, appetite stimulation, and anti-nausea effects
- CBG - Antibacterial, reduces gut inflammation, and promotes intestinal healing
- CBC - Enhances anti-inflammatory and pain-relief effects
- THCV - Helps regulate gut motility and inflammation

Terpenes

- Caryophyllene - Anti-inflammatory and pain-relieving properties, directly interacts with CB2 receptors in the gut
- Limonene - Aids digestion, reduces nausea, and provides stress relief
- Myrcene - Helps with muscle relaxation, cramping, and pain relief
- Linalool - Anti-anxiety and anti-inflammatory, helps with gut discomfort
- Pinene - Supports respiratory function and has anti-inflammatory effects

Recommended Products

- CBD/THC Tinctures - Fast absorption and helps reduce inflammation
- RSO (Rick Simpson Oil) or Full-Spectrum Cannabis Oils - Potent anti-inflammatory effects and symptom relief
- Edibles/Pills - Long-lasting relief for inflammation and digestive issues, but may be difficult for some patients
- THC/CBD Suppositories - Direct absorption for localized gut relief
- Inhalable Flower or Vape (Caryophyllene & Limonene-Rich Strains) - Provides quick relief for nausea, pain, and stress.

Diabetic/Peripheral Neuropathy

Reduces Nerve Pain & Inflammation

THC, CBD, and CBG interact with the endocannabinoid system to reduce inflammation and block pain signals

Protects Nerve Health & Regeneration

Cannabinoids like CBD and CBG have neuroprotective properties that may help slow nerve damage

Improves Sleep & Reduces Discomfort

Myrcene, CBN, and linalool promote relaxation and help manage nighttime pain

Cannabinoids

- CBD - Reduces nerve inflammation and protects against further damage
- THC - Provides direct pain relief by altering pain perception in the brain
- CBG - Supports nerve health and reduces inflammation
- CBC - Works with other cannabinoids to enhance pain relief
- CBN - Helps with sleep and nighttime nerve pain

Terpenes

- Caryophyllene - Reduces inflammation and pain
- Myrcene - Sedative and muscle-relaxing effects, helps with sleep and pain relief
- Linalool - Calming and anti-inflammatory, reduces nerve pain
- Pinene - Supports cognitive clarity and has mild anti-inflammatory effects
- Limonene - Uplifting and stress-reducing, helps with neuropathic pain

Recommended Products

- Full-Spectrum CBD/THC Tinctures (1:1 or high CBD) - Easy to dose and effective for pain relief
- RSO or Full-Spectrum Extracts - Potent, long-lasting pain management
- Edibles/Pills - Provides extended pain relief
- Topicals - Directly apply to affected areas for localized relief
- Inhalable Flower or Vape (high-caryophyllene & myrcene strains) - Immediate relief for acute nerve pain

Glaucoma

Reduces Intraocular Pressure (IOP)

THC temporarily lowers intraocular pressure which is the main risk factor for glaucoma, and it can help slow optic nerve damage

Neuroprotection for the Optic Nerve

CBD and CBG have neuroprotective properties which help prevent further damage to the optic nerve.

Anti-Inflammatory & Pain Relief

Helps reduce ocular inflammation which can contribute to glaucoma progression

Cannabinoids

- THC - Primary compound that lowers intraocular pressure. However, the effects are short-lived, requiring frequent dosing
- CBD - Offers neuroprotection, but high doses may increase IOP, so it should be used carefully
- CBG - May help reduce IOP and has neuroprotective properties
- THCV - May support ocular blood flow, which is essential for maintaining healthy vision

Terpenes

- Caryophyllene - Anti-inflammatory, reduces ocular discomfort
- Linalool - Helps with pain relief, relaxation, and neuroprotection
- Myrcene - Muscle relaxant and sedative effects, which helps with eye strain
- Pinene - Improves oxygenation and blood flow to the optic nerve
- Limonene - Anti-inflammatory and may reduce stress related to glaucoma

Recommended Products

- THC-Rich Tinctures - Provide fast-acting relief for IOP reduction
- Edibles/Pills - Long-lasting effects to help maintain lower IOP for extended periods.
- Vape Cartridges and Inhalable Flower - Fast relief for sudden IOP spikes.

Hepatitis

Liver Protection & Anti-Inflammatory

CBD and CBG reduces liver inflammation and fibrosis

Nausea & Appetite Stimulation

THC helps reduce nausea and improve appetite which is essential for maintaining proper nutrition during hepatitis treatment

Pain & Fatigue Management

Helps relieve muscle pain, joint discomfort, and severe fatigue.

Cannabinoids

- CBD - Anti-inflammatory and helps reduce liver fibrosis and oxidative stress
- CBG - Has hepatoprotective properties and may help prevent liver damage
- THC - Helps manage nausea, pain, and appetite loss
- CBC - Works with THC and CBD to enhance pain relief and reduce inflammation
- THCV - Helps regulate metabolism and reduce fat accumulation in the liver

Terpenes

- Caryophyllene - Strong anti-inflammatory and supports liver health
- Limonene - Aids digestion, reduces nausea, and antioxidant benefits
- Myrcene - Helps with pain relief, relaxation, and muscle recovery
- Pinene - Supports respiratory health and has anti-inflammatory effects
- Linalool - Reduces stress, anxiety, and promotes overall wellness

Recommended Products

- CBD/CBG Tinctures - Supports liver health and reduces inflammation
- RSO or Full-Spectrum Oils - Potent anti-inflammatory and healing benefits
- Edibles/Pills - Long-lasting relief from nausea, pain, and inflammation
- Topicals - Helps with joint and muscle pain
- Vape or Flower (caryophyllene & limonene-rich strains) - Provides fast relief from nausea and pain

HIV/AIDS

Pain & Neuropathy Relief

THC and CBD reduce nerve pain and inflammation

Appetite Stimulation & Weight Management

THC stimulates appetite which helps maintain weight and overall health

Nausea & Gastrointestinal Relief

Reduces nausea and vomiting which improves adherence to medications, especially antiretroviral medications can cause nausea and digestive issues

Cannabinoids

- THC - Reduces pain, nausea, and stimulates appetite
- CBD - Helps with inflammation, anxiety, and neuropathy while balancing THC's psychoactive effects
- CBG - Supports the immune system and has potential antiviral properties
- CBC - Works with THC and CBD to enhance pain relief and reduce inflammation
- THCV - Can modulate appetite and help with metabolic health

Terpenes

- Myrcene - Pain relief, muscle relaxation, and sedation for better sleep
- Limonene - Mood elevation, anti-nausea, and digestive support
- Caryophyllene - Anti-inflammatory and immune support
- Linalool - Anti-anxiety, anti-inflammatory, and helps with sleep
- Pinene - Bronchodilator, anti-inflammatory, and helps cognitive functions

Recommended Products

- Rick Simpson Oil (RSO) - Full-spectrum cannabis oil with high THC content for pain, appetite stimulation, and overall well-being
- Edibles/Pills - Long-lasting relief from pain and nausea
- Tinctures (THC/CBD or CBG blends) - Fast absorption and easy dosage
- Vape or Inhalable Flower with myrcene and limonene-rich strains) – Quick relief for nausea, pain, and mood elevation

Huntington's Disease

Reduces Motor Symptoms (Spastic Movement & Muscle Rigidity)

THC activates CB1 receptors which helps regulate motor function, reducing involuntary movements and muscle stiffness. CBD also supports neuroprotection, preventing further damage to motor neurons.

Neuroprotection & Anti-Inflammatory Effects

CBD and CBG have neuroprotective properties that may slow the progression of neurodegeneration. THC and CBC reduce neuroinflammation, which is linked to the worsening of Huntington's symptoms.

Mood Stabilization & Sleep Improvement

CBD and CBN reduce anxiety, depression, and sleep disturbances

Cannabinoids

- THC - Reduces muscle rigidity, suppresses involuntary movements, and improves sleep
- CBD - Neuroprotective, anti-inflammatory, and helps with anxiety and depression
- CBG - Supports brain health and may slow neurodegeneration
- CBN - Sedative effects help with sleep and muscle relaxation
- CBC - Enhances pain relief and reduces neuroinflammation

Terpenes

- Linalool - Calming, muscle-relaxing, and sleep-promoting properties
- Myrcene - Sedative and muscle relaxant, reduces spasms and anxiety
- Caryophyllene - Anti-inflammatory and pain relief
- Pinene - Enhances cognitive function and helps with neuroprotection
- Limonene - Mood-boosting and anti-anxiety, helps with stress relief

Recommended Products

- CBD/THC Tinctures (1:1 or 2:1 Ratios) - Fast-acting and long-lasting, helps with motor symptoms, mood, and inflammation
- Edibles/Pills - Sustained relief, especially for sleep and muscle stiffness
- Vape Cartridges (CBD or Indica-Dominant Strains) - Fast relief for tremors and anxiety
- Topicals - Localized pain relief in stiff muscles and joints

Irritable Bowel Syndrome (IBS)

Regulates Gut Inflammation

Cannabinoids like THC and CBD reduce gut inflammation by interacting with the CB2 receptors in the immune system

Relieves Abdominal Pain & Cramping

THC and CBD interact with the endocannabinoid system (ECS) to regulate pain perception which reduces spasms and discomfort in the digestive tract

Reduces Stress & Anxiety

Since IBS is often triggered by stress, cannabis helps calm the nervous system by interacting with serotonin receptors and reducing stress-related flare-ups

Cannabinoids

- CBD - Anti-inflammatory and gut-calming, it helps regulate the immune system and ease intestinal discomfort without psychoactive effects
- THC - Reduces pain, nausea, and cramping, while stimulating appetite
- CBG - Supports gut movement and reduces inflammation
- CBC - Enhances the effects of THC and CBD
- CBN - Calming and improves sleep

Terpenes

- Myrcene - Relaxes muscles and reduces cramping for calming gut spasms
- Linalool - Soothes anxiety and stress
- Caryophyllene - Provides anti-inflammatory and analgesic properties
- Pinene - Supports respiratory and digestive health, reducing inflammation in the intestines
- Limonene - Helps reduce bloating and stress-related IBS symptoms

Recommended Products

- Tinctures - Fast-acting and long-lasting, taken under the tongue
- Pills/Edibles - Long-lasting relief, especially in full-spectrum ratios
- Inhalable Flower or Vape - Fast-acting relief
- Suppositories - Direct absorption for severe IBS pain and cramping

Menstrual Cramps

Pain Relief & Muscle Relaxation

THC and CBD interact with the body's pain receptors to relax muscles and reduce cramping and discomfort

Reduces Inflammation

CBD, CBG, and caryophyllene help lower prostaglandin levels which cause menstrual pain and inflammation

Mood Stabilization & Stress Reduction

Linalool and limonene terpenes help with mood swings, anxiety, and irritability related to PMS

Cannabinoids

- CBD - Anti-inflammatory, muscle relaxant, and pain reliever
- THC - Eases pain and promotes relaxation
- CBG - Reduces inflammation and may help with bloating
- CBC - Works with THC and CBD to enhance pain relief
- CBN - Helps with relaxation and sleep, especially for nighttime cramps

Terpenes

- Caryophyllene - Strong anti-inflammatory and pain-relieving effects
- Myrcene - Muscle relaxant, sedative, and pain reliever
- Linalool - Calming, anti-anxiety, and muscle relaxant properties
- Limonene - Uplifting, mood-enhancing, and stress-reducing
- Pinene - Helps reduce inflammation and improves relaxation

Recommended Products

- CBD/THC Tinctures - Fast-acting relief for pain and inflammation
- Edibles/Pills - Long-lasting pain relief and relaxation
- Suppositories - Direct absorption for pain and cramping
- Balms/Creams - Apply to the lower abdomen for localized relief
- Bath Bombs - Helps relax muscles and relieve cramps while promoting relaxation
- Inhalable Flower or Vape (Caryophyllene & Myrcene-Rich Strains) - Immediate relief for severe cramps and mood stabilization

Multiple Sclerosis (MS)

Reduces Muscle Spasticity & Tremors

THC and CBD help relax muscles, reducing spasticity, stiffness, and involuntary movements

Manages Chronic Pain & Inflammation

Cannabinoids like THC, CBD, and CBG interact with pain receptors to reduce nerve pain and inflammation

Improves Sleep & Mental Well-Being

Helps combat MS-related fatigue, depression, and insomnia by promoting relaxation and mood balance

Cannabinoids

- THC - Relieves muscle spasms, reduces neuropathic pain, and promotes relaxation
- CBD - Anti-inflammatory and neuroprotective, helps with pain, immune function, and mood stability
- CBG - Supports nerve regeneration and reduces neuroinflammation
- CBC - Works with THC and CBD to enhance pain relief and improve mood
- THCV (low dose) - Can help regulate motor control and reduce tremors

Terpenes

- Caryophyllene - Strong anti-inflammatory and pain-relieving effects
- Myrcene - Muscle relaxant and sedative properties, helping with spasticity
- Linalool - Calming, helps with anxiety, pain, and sleep disorders
- Pinene - Supports cognitive clarity and respiratory function
- Humulene - Anti-inflammatory, can help reduce autoimmune flare-ups

Recommended Products

- THC/CBD Tinctures - Effective for pain, muscle spasms, and inflammation
- RSO or Full-Spectrum Extracts - Relief for chronic pain and inflammation
- Edibles/Pills - Long-lasting symptom relief
- Creams/Balms/Patches - Localized relief for muscle stiffness and pain
- Inhalable Flower or Vape (caryophyllene & myrcene-rich strains) - Fast-acting relief for breakthrough pain and spasms

Muscular Dystrophy

Alleviates Chronic Pain & Muscle Spasms

Helps relieve chronic pain and reduce muscle tightness

Reduces Inflammation

Cannabinoids like CBD have anti-inflammatory properties that help reduce inflammation

Improves Mental Health

Helps reduce stress, anxiety, and tension

Cannabinoids

- CBD - Anti-inflammatory and pain-relieving properties helps manage chronic pain and inflammation
- THC - Helps reduce muscle spasms and alleviate pain, improving mobility and comfort
- CBN - Promotes better sleep quality, aiding in muscle recovery and overall well-being

Terpenes

- Linalool - Helps reduce anxiety and promote relaxation, beneficial for mental health
- Myrcene - Sedative and muscle relaxant, aiding with stiffness and sleep
- Caryophyllene - Anti-inflammatory and pain relief
- Humulene - Helps reduce inflammation, aiding in pain management
- Pinene - Helps with cognitive function, has anti-inflammatory effects, and acts as a bronchodilator while reducing the fog effects of THC

Recommended Products

- Sublingual Tinctures (high-CBD) - Quick absorption, helping manage acute pain and muscle spasms
- Edibles/Pills - Sustained relief, especially for sleep and muscle stiffness.

Parkinson's Disease

Reduces Tremors & Muscle Stiffness

THC and CBD relax muscles and regulate dopamine levels, reducing involuntary movements

Provides Neuroprotection & Reduces Inflammation

CBD, CBG, and THCV have neuroprotective properties that may slow disease progression

Improves Sleep & Mood

CBD, CBG, and limonene work to balance serotonin and dopamine levels helping with depression and mood swings

Cannabinoids

- CBD - Anti-inflammatory, neuroprotective, and helps with anxiety and sleep
- THC - Reduces tremors, muscle stiffness, and pain while improving sleep
- CBG - Helps with neuroinflammation and nerve cell protection
- THCV (low doses) - May improve motor control and cognitive function
- CBC - Works with CBD and THC to enhance neuroprotective effects

Terpenes

- Linalool - Calms the nervous system, helping with anxiety and sleep
- Myrcene - Muscle relaxant, helps with spasticity and sedation
- Caryophyllene - Anti-inflammatory, pain-relieving, and neuroprotective
- Pinene - Improves focus, memory, and respiratory function
- Limonene - Uplifting effects help with depression and mood stability

Recommended Products

- CBD/THC Tinctures - Helps with tremors, pain, and sleep
- RSO or Full-Spectrum Extracts - Potent and long-lasting neuroprotection
- CBD/THC Edibles/Pills - Provides extended symptom relief
- Topicals - Helps with localized muscle stiffness and pain
- Inhalable Flower or Vape (linalool & caryophyllene-rich strains) - Fast relief for tremors and anxiety

PTSD

Reduces Anxiety & Fear Response

CBD and THC regulate the endocannabinoid system to lower overactive fear responses and anxiety

Improves Sleep & Reduces Nightmares

THC, CBN, and sedative terpenes help combat PTSD-related insomnia and nightmares

Enhances Emotional Regulation & Mood Stability

CBD, CBG, and limonene work to balance serotonin and dopamine levels, helping with depression and mood swings

Cannabinoids

- CBD - Non-psychoactive, reduces anxiety, stress, and emotional dysregulation
- THC - Eases flashbacks, nightmares, and promotes relaxation
- CBN - Sedative effects help with PTSD-related insomnia
- CBG - Supports mood stability and reduce stress-related inflammation
- THCV - Helps regulate mood and reduce hyperarousal

Terpenes

- Linalool - Strong calming effects, reduces anxiety and promotes relaxation
- Myrcene - Sedative properties help with sleep and relaxation
- Caryophyllene - Reduces stress and regulates mood
- Limonene - Helps combat depression and emotional instability
- Pinene - Helps with focus, clarity, and reducing stress without drowsiness

Recommended Products

- CBD/THC Tinctures - Fast-acting and effective for anxiety and emotional stability
- Full-Spectrum Cannabis Oils (RSO or high-CBD extracts) - Potent, long-lasting relief for severe PTSD symptoms
- Edibles/Pills - Long-lasting effects for anxiety, nightmares, and stress relief
- CBD/CBN Sleep Aids - Helps with PTSD-related insomnia and nightmares
- Inhalable Flower or Vape - Immediate relief for acute anxiety or flashbacks

Seizures

Stabilizes Neuronal Activity

CBD and THCV help regulate brain function by reducing overactive nerve signaling

Reduces Neuroinflammation & Oxidative Stress

CBD, CBG, and CBC help protect brain cells from inflammation and damage

Helps Modulate through the Endocannabinoid System

Cannabinoids interact with CB1 and CB2 receptors to balance neurotransmitter activity helping to prevent seizure onset

Cannabinoids

- CBD - FDA-approved in Epidiolex for epilepsy and works by stabilizing neuronal activity
- THCV (low dose) - Helps reduce seizures by modulating brain activity
- CBG - Has neuroprotective effects that may help with seizure disorders
- CBC - Works with CBD to enhance seizure control
- THC (controlled doses) - Some forms of epilepsy respond well to THC, though too much may trigger seizures in sensitive individuals

Terpenes

- Linalool - Has calming and anti-epileptic properties
- Myrcene - Sedative effects help with seizure recovery and relaxation
- Caryophyllene - Anti-inflammatory and neuroprotective
- Pinene - Enhances cognitive function and helps with post-seizure fog
- Humulene - Helps reduce inflammation and supports brain health

Recommended Products

- CBD-Dominant Tinctures - Fast-acting and effective for seizure prevention
- CBD/THC Capsules (high-CBD, low-THC formulations) - Provides extended seizure protection
- Full-Spectrum CBD/THCV Edibles (low-THC, high-CBD blends) - Helps with seizure control and neuroprotection
- Vape or Inhalable Flower (high-linalool & caryophyllene strains) - Immediate relief for seizure warning signs or recovery

Severe or Intractable Nausea

Suppresses the Vomiting Reflex

THC interacts with CB1 receptors in the brainstem, reducing nausea and preventing vomiting

Regulates Gut Motility & Inflammation

CBD and CBG help soothe digestive distress and inflammation

Reduces Anxiety & Stress-Related Nausea

Linalool, limonene, and CBD help calm the nervous system preventing nausea triggered by anxiety or pain

Cannabinoids

- THC - Reduces nausea and stimulates appetite
- CBD - Reduces gut inflammation, modulates serotonin receptors, and prevents nausea without intoxication
- CBG - Helps regulate digestion and relieve nausea associated with gastrointestinal issues
- THCV (low dose) - Helps suppress nausea, especially in conditions like cyclic vomiting syndrome
- CBC - Works with THC and CBD to enhance nausea relief

Terpenes

- Limonene - Supports digestion, relieves stress-related nausea, and has an uplifting effect
- Myrcene - Has anti-spasmodic effects, relaxing the stomach muscles and reducing nausea
- Linalool - Calms anxiety and nausea, helpful for motion sickness and stress-induced nausea
- Caryophyllene - Anti-inflammatory for gut-related nausea and pain
- Pinene - Respiratory function and mental clarity, reducing nausea triggers

Recommended Products

- THC-Dominant Tinctures - Provides rapid nausea relief
- RSO or Full-Spectrum Extracts - Potent, long-lasting anti-nausea effects
- Edibles/Pills - Helps sustain nausea relief throughout the day
- CBD/THC Vapes or Inhalable Flower (limonene & myrcene-rich strains) – Immediate relief for acute nausea episodes

Sickle Cell Anemia

Pain Management

THC and CBD interact with the body's pain receptors to provide relief from chronic and acute pain episodes reducing the need for opioids

Reduces Inflammation & Improves Blood Flow

CBD and CBG have anti-inflammatory properties that may help reduce vascular inflammation and improve circulation

Manages Stress, Anxiety & Sleep Disorders

Cannabis (especially CBD and linalool-rich strains) helps with relaxation and sleep quality

Cannabinoids

- THC – Pain relief, reduces stress, and promotes relaxation
- CBD – Anti-inflammatory, reduces pain perception, and supports immune function
- CBG – Helps improve blood circulation and may reduce oxidative stress
- CBC - Enhances pain relief and reduce inflammation
- THCV - May help regulate blood vessel function and reduce fatigue

Terpenes

- Caryophyllene – Anti-inflammatory and pain-relieving
- Myrcene – Helps with pain relief, muscle relaxation, and sleep
- Linalool – Anti-anxiety, anti-inflammatory, and sedative effects help with stress and sleep
- Limonene - Elevates mood, reduces stress, and antioxidant benefits
- Pinene – Supports respiratory health, reduces inflammation, and may aid cognitive function

Recommended Products

- Full-Spectrum Tinctures – Long-lasting relief from pain and inflammation
- RSO or High-THC Concentrates – Severe pain management
- Edibles/Pills – Offers prolonged pain relief and relaxation
- Topicals – Provides localized relief for muscle and joint pain
- Inhalable Flower or Vape (Caryophyllene & Myrcene-Rich Strains) – Fast relief for pain and anxiety

Spastic Quadriplegia

Reduction of Muscle Spasticity

THC reduces muscle spasticity providing relief from the involuntary muscle contractions associated with conditions like cerebral palsy

Pain Management

CBD can alleviate chronic pain, and its anti-inflammatory effects contribute to pain reduction

Seizure Control

Both THC and CBD reduce the frequency and severity of seizures

Cannabinoids

- THC - Reduces muscle spasticity and alters pain perception pathways providing analgesic effects
- CBD - Reduces inflammation decreasing muscle stiffness and may protect nerve cells from damage, supporting overall neurological health
- CBG - Decreases inflammation and reduce muscle spasms

Terpenes

- Linalool - Calming effects and pain relief, beneficial for muscle spasms
- Myrcene - Helps alleviate muscle tension and promote relaxation
- Caryophyllene - Binds to CB2 receptors reducing inflammation and pain
- Pinene - Reduces inflammation and improves airflow
- Limonene - Elevates mood which can be beneficial in managing the emotional challenges associated with chronic conditions

Recommended Products

- High-THC Tinctures - Sublingual administration allows for rapid absorption, aiding in quick relief from spasticity
- CBD-Rich Oils - Oral consumption can provide systemic relief from inflammation and pain
- Balanced THC/CBD Edibles/Pills - Offers prolonged effects
- Vape Cartridges - Immediate relief through inhalation, useful for acute symptom flare-ups

Spinal Cord Disease or Severe Injury

Reduces Neuropathic Pain & Inflammation

THC, CBD, and CBG work to block pain signals and reduce inflammation in the central nervous system

Eases Muscle Spasms & Spasticity

THC and myrcene-rich strains help relax muscles and prevent involuntary contractions

Improves Sleep & Mental Health

Supports better sleep, reduces anxiety, and combats depression related to spinal cord injuries

Cannabinoids

- THC - Alters pain perception and reduces muscle spasticity
- CBD - Anti-inflammatory and neuroprotective properties help reduce nerve damage
- CBG - Supports nerve regeneration and pain relief
- CBC - Enhances pain control and reduce inflammation
- CBN - Sedative effects help with sleep disturbances

Terpenes

- Caryophyllene - Strong anti-inflammatory and pain-relieving effects
- Myrcene - Muscle relaxant, sedative, and analgesic properties
- Linalool - Calming, reduces muscle spasm, and promotes relaxation
- Pinene - Neuroprotective properties, may support cognitive clarity
- Limonene - Uplifting effects, helps combat stress and depression

Recommended Products

- Full-Spectrum Tinctures - Easy to dose, effective for pain and muscle spasticity
- RSO or Full-Spectrum Extracts - For severe pain and inflammation
- Edibles/Pills - Extended relief for chronic pain and muscle spasms
- Creams/Balms - Localized pain relief
- Inhalable Flower or Vape (High-Caryophyllene & Myrcene Strains) - Provides immediate relief for breakthrough pain and spasticity
