

ToP STRATEGIC PLANNING

Technology of Participation(ToP)®

A structured methodology that unleashes individual and group creativity, establishes a collaborative and motivating vision, inspires deep thought around strategic issues, and creates an implementation plan that is responsive, dynamic, and measurable.

I had a wonderful time participating in the ToP Strategic Planning course. The trainers were engaging. They took the time to go through the process and gave time for questions. These skills will help me to facilitate great strategic planning sessions with future clients”

-Jerome' Holston, MPA

You'll learn facilitation skills to help groups

- Create a shared vision
- Surface “hidden” realities that hinder progress
- Set strategic directions
- Prioritize and align substantial actions
- Define measurable goals
- Create clear and realistic tasks and timelines
