

# Opulent Pink Legacy

Limited to only 288

Exclusive to a Crypto holders only!

Pink diamonds extracted from the Argyle mine in the Kimberley region of Western Australia are some of the oldest and rarest diamonds ever found. They have been dated to be 1.58 billion years old, and the volcano that created them is about as old too, at 1.1 to 1.2 billion years old

In **November 2020** mining ceased at Argyle, after 37 years of operations and producing more than 865 million carats of rough diamonds. What does this mean? There will be no more rare Argyle diamonds being mined.

So the value will only keep on increasing. This is why Craig Leonard and the worlds famous Artis Sharon Davson crated 288 limited coins with 4 rare Argyle diamonds surrounded by rose gold with Sharon's rare art work embedded to celebrate the beauty of this rare gem. So not only will this coin increase in value due to the Argyle diamonds but the Art it's self will also increase making this a must have to your collection.

## The Treasures of the Kimberley coin

"Unearthed in its Solid Silver and Solid Platinum variations totals over \$4m in limited edition art.

Unearthed has been applauded as a fabulous entry level for new collector investors in Davson Art or Argyle Mine Pink Diamonds; and a 'must have' for all current collectors.

Especially as this is Davson's first art work with those pink diamonds.

Among the things I find fascinating about Davson, is that to date she has only completed about 120 paintings in her forty-year professional career. That makes paintings by her among

the rarest in the world for such a renowned artist. (Most artists of her stature have produced many times that number.)

Rare art, precious metals, rare diamonds.... Legendary stuff.

You would probably have to go back to Leonardo Da Vinci to find a renowned artist with fewer actual finished paintings and of high value. Perfect artist for creating a rare high valued coin with rare pink diamonds. Davson never ceases to amaze."

How can i qualify?

I've teamed up with Craig the Ceo of Pink diamond investments to give you a rare Opportunity to own this master piece all you need to do is have a wallet with funds in USDT CRYPTO

#### Davson, the Artist

Sharon Davson has always followed her passions to assist all on our Earth. Along the way her art became treasured inclusions in royal, museum, celebrity, corporate and private collections, and had her acknowledged as a leading spiritual and environmental artist and global citizen. Her paintings are inspirational and loved. They also place her among the highest valued female artists in the world.

Colour: ..... 5PP  
Saturation: ..... FIPP  
Clarity: ..... VS1  
Quantity: ..... 4

UNEARTHED Argyle Art Coin contains the above certified Argyle Pink Diamonds

#### About the Argyle

The Argyle Diamond Mine is located in the East Kimberley region in the remote north of Western Australia. This is the largest diamond producer in the world by volume, although due to the low proportion of gem-quality diamonds it is set to close by 2020. The Argyle pink diamond's spectacular outback origin can be seen in every shade of the desert sunset, from a cherry blossom pink, a soft rose, an alluring violet to a dramatic red.
